

Tilt And Turn Windows

Though often called 'continental' style windows, tilt and turns are well established in the UK market and a very popular option.

When opened in the tilt position, these windows facilitate air circulation in a room within just a few minutes, ideal for hot summer evenings.

In the turn or fully open position, tilt and turn windows provide a convenient answer to cleaning hard-to-reach windows as they can be swung through 180 degrees and cleaned from the inside. Also available in white warm mahogany and golden oak finishes, tilt and turn windows can exactly match the finish of your casement windows.

Glazing Options

The diverse range of our glazing options means you can really reflect your individual style and personality in your windows. Whether you want leaded, Georgian, clear, patterned or stained glass in your windows, we can help you choose the right look for your home and your budget.

Security And Safety

With a high percentage of burglaries committed by opportunists on easy targets, no home owner nowadays can afford to neglect basic security precautions. With our double glazed replacement windows, you can choose your own level of security by incorporating the latest locking systems. We will be able to provide you with details on a full range of security systems.

For the safety conscious, tilt and turn windows provide a large unrestricted opening for use as an emergency exit. Special hinges are also available for casement windows, so they can be opened wide in emergencies.

Toughened glass (complying with British Standard) is used for all glazing under 800mm from floor level for extra strength and for your peace of mind.

You can sleep safe at night in the knowledge that REHAU PVC-U is self-extinguishing and will not burn unless exposed to a powerful and continuous heat source.
