Internally Beaded 70mm PVC-U Windows

Congratulations

You've obviously achieved a great deal in your home already, to get to the stage where you would like to add replacement double glazed PVC-U windows for that finishing touch.

As with any investment, you should carefully consider all the options available. All windows are not the same, though superficially it may seem that way.

The system we use to manufacture our high quality double glazed replacement windows is designed by REHAU.

Specialising in design, the company doesn't make or install them, preferring to leave all that to the experts. However, by choosing PVC-U windows made with REHAU profiles, you're guaranteed new windows of very high quality that will blend perfectly with your home.
