Design and Access Statement

4 London Road, Long Sutton

Proposal to move the internal bathroom door from its existing position back to its original location.

The original location can been seen in the old lath and plaster wall where it has been filled in. The door appears to be the original.

We would like to move the door back to allow a shower to be installed but also to restore the layout closer to the original.

If there is existing woodwork for the door frame left in the original position then this will be reused if in good enough condition.

There are no original surrounds for the door but we will source replacements as close as possible to match the existing in the house.

The original door will also be rehung.

There are patches of blown/damaged plaster on the internal bathroom wall which we would remove and replace with Heritage lime plaster.
