CASE OFFICER ASSESSMENT

Proposal

This is a planning application seeking outline planning permission for a single residential dwelling, on land adjacent to 9 Delph Road, Long Sutton.

This outline application has been submitted with all matters reserved.

Site Description

The site is located on Delph Road in Long Sutton. The adjacent property, No.9 Delph Road, comprises a detached buff brick constructed bungalow located in a predominantly residential area. There is an attached flat roofed garage to the side and a large gravelled driveway to the front. To the rear is an old conservatory and a modest garden enclosed by fencing and greenhouses.

Immediately to the west lies the residential property of No.13 Delph Road.

History

H11-0375-23 - Demolition of existing conservatory & erection of extension - Approved

Consultation Responses

South Holland Internal Drainage Board

No objections. Consent may be required under Byelaw 2, not currently required under Section 23 and is not applicable under Byelaw 10.

Lincolnshire County Council Highways Authority

Substantive Response provided in accordance with article 22(5) of The Town and Country Planning (Development Management Procedure) (England) Order 2015:

Recommendation: No objection

The principle of development is acceptable. As this is an outline application with all matters reserved, access and layout have not been considered.

Please make the applicant aware of the requirements for access, parking, visibility, turning and layout as detailed within the Lincolnshire County Council Design Approach, in order to support any further application.

Additionally, sufficient information will be required to demonstrate that the use of a suitable drainage system for the management of surface water run-off is appropriate for this site to mitigate concerns with flooding of the property and surrounding land.

Having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed development would not be expected to have an unacceptable impact upon highway safety or a severe residual cumulative impact upon the local highway network or increase surface water flood risk and therefore does not wish to object to this planning application.

As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to drainage and surface water flood risk on all Major applications. This application is classified as a Minor Application and it is therefore the duty of the Local Planning Authority to consider the surface water flood risk and drainage proposals for this planning application.

Lincolnshire County Council Historic Places

Thank you for consulting us on this.

Having reviewed the application documents and the available Historic Environment information for this application, the proposal is unlikely to have an impact on significant archaeological remains. Consequently, no archaeological input is necessary for this application.

South Holland District Council Environmental Protection

I request a standard land contamination condition be applied at this location.

Key Planning Considerations

The main issues and considerations in this case are (but are not limited to):

- Principle of Development and Sustainability
- Layout, Design and Impact on the Character of the Area
- Impact on Neighbouring Residents/Land Users/Land Uses
- Highway Safety and Parking
- Flooding Risk Considerations and Drainage

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework (December 2023) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Furthermore, where a Neighbourhood Plan has been adopted, this alongside the adopted Local Plan, forms part of the Development Plan for the District, and must be considered when assessing development proposals. In this instance, no relevant neighbourhood plans have been adopted.

The Authority is able to demonstrate a supply of deliverable sites equivalent to in excess of 5 years through the latest Housing Land Supply Assessment.

Planning Considerations

Principle of Development and Sustainability

The South East Lincolnshire Local Plan sets out the settlement hierarchy in respect of delivering

sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order. The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy in respect of sustainable development are areas of limited development opportunity including Minor Service Centres, with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan indicates that within Main Service Centres, development will be permitted that supports their role as a service centre for the settlement itself, helps sustain existing facilities or helps meet the service needs of other local communities.

The National Planning Policy Framework, (NPPF) (December 2023) outlines, within para 60, that "to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay and that land with permission is developed without unnecessary delay".

Para 70 of the NPPF (December 2023) also emphasises the importance that the contribution of small to medium sized sites can make in meeting the housing requirements. ("Small and medium sized sites can make an important contribution to meeting the housing requirement of an area and are often built-out relatively quickly"). This policy seeks to ensure that there is a sufficient supply of homes and advises that sites of all sizes make a contribution to the housing requirement of an area.

The application site in this instance is within Long Sutton, a Main Service Centre, and lies within the defined settlement boundaries as detailed by Policy 1. The application site lies between two existing residential plots, within a residential area that comprises a relatively consistent pattern in respect of the siting of residential plots. In context of this, the principle of residential development within this location is considered to be appropriate, comprising an appropriate form of development for the location and would be in accordance with the overall principles of the spatial strategy.

As such, the proposal is considered to be in accordance with the requirements of Policy 1 of the South East Lincolnshire Local Plan when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, impact on highway safety and flood risk, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2023) specifically relates to 'Achieving well-designed and beautiful places' and details that "The creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2023), states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive

and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework, in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The proposal is in outline form; however, an indicative site layout plan has been provided alongside a covering letter. Within the covering letter it states that a chalet style bungalow would be best suited within this site to retain the character, as the surrounding area comprises a bungalow and a chalet bungalow within the immediate vicinity. The indicative plan also shows that the site could accommodate such a property, with the dwelling itself being shown to be brought forward in comparison to that of No.9 Delph Road, allowing a continuation of the slightly staggered linear pattern along Delph road to remain. The size appears to be proportionate in relation to the plot and other dwellings but details on the design are of course reserved.

The indicative layout illustrates that a dwelling could be accommodated as to face directly onto the public highway with the access driveway connecting to this. It demonstrates sufficient space and sits well within its plot to ensure it does appear cramped whilst also leaving adequate room for the existing 9 Delph Road. Both properties would have ample amenity space. One dwelling would be an acceptable quantum of development and is of an appropriate density insofar as there would not be overdevelopment.

Although no details of the materials have been submitted, if outline approval is granted, the subsequent reserved matters application would be submitted with the LPA being required to assess the exact detail of the proposal, including to ensure that the materials are in keeping with the character of the area with the visual amenity of the development being determined when these details have been provided.

Taking account of the nature of the development, as detailed above, the proposal is considered to be acceptable, subject to appropriate design at reserved matters stage. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with policies 2 and 3 of the South East Lincolnshire Local Plan and Section 12 of the National Planning Policy Framework (December 2023).

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2023) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

The application has been submitted in outline form with all matters reserved; as such, the LPA are unable to fully assess the potential overlooking impact of the future dwelling. However, the indicative layout and illustrative scale of the development, comprising a chalet bungalow, demonstrates that the site can accommodate such a development without causing an unacceptable adverse impact in this respect and without resulting in unacceptable views, subject to the

appropriate design at reserved matters stage.

Furthermore, the same can be said for the overshadowing aspect of this plot. The finished floor levels will be raised 400mm from the existing ground level of the site, this coupled with the likely chalet style design ensures that the levels would not be raised to a harmful level. Finally, this also ensures it will not appear overbearing on the street scene as well other neighbouring properties.

As detailed above, the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2023), and Policies 2 and 3 of the Local Plan.

Highway Safety and Parking

Section 9 of the National Planning Policy Framework (December 2023) specifically relates to 'Promoting sustainable transport'. Paragraph 115 of the National Planning Policy Framework (December 2023) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Further, policy 36, to be read in conjunction with Appendix 6 of the South East Lincolnshire Local Plan, sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

Whilst the indicative plan shows that there are two spaces provided to the front of the property, as this application has been submitted in outline form, the details of access and parking have not been provided.

Lincolnshire County Council raised no objections to this development stating 'The principle of development is acceptable. As this is an outline application with all matters reserved, access and layout have not been considered. Please make the applicant aware of the requirements for access, parking, visibility, turning and layout as detailed within the Lincolnshire County Council Design Approach, in order to support any further application. Additionally, sufficient information will be required to demonstrate that the use of a suitable drainage system for the management of surface water run-off is appropriate for this site to mitigate concerns with flooding of the property and surrounding land'.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Local Plan Policies 2, 3 and 36, and Section 9 of the National Planning Policy Framework (December 2023).

Flooding Considerations

Section 14 of the National Planning policy Framework (December 2023) requires development plans to "apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: a) applying the sequential test and then, if necessary, the exception test as set out below".

Paragraph 168 details "The aim of the sequential test is to steer new development to areas with the lowest risk of flooding from any source. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding", with the sequential approach being required in areas known to be at risk now or in the future from any form of flooding, with the flood risk assessment being the tool to demonstrate this.

If, following the application of the Sequential Test, it is not possible, consistent with wider sustainability objectives, for the development to be located in zones with a lower probability of flooding, the Exceptions Test can be applied if appropriate.

The site lies within Flood Zones 3 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the South East Lincolnshire Strategic Flood Risk Assessment (2017) as a basis to apply the sequential test.

The Residual Flood Hazard Map for the 1% fluvial and 0.5% tidal event shows the site being outside of low hazard area for the present day, and for 2116. The Residual Peak Depth Map for the 1% fluvial and 0.5% tidal shows that the site is outside of the area at risk in the present day, and for 2116.

The proposed residential development is in Flood Zone 3, the site benefits from defences on the tidal River Nene and provides protection during the 1% annual probability (1 in 100 chance each year) fluvial event and 0.5% annual probability (1 in 200) tidal event including climate change. There is considered to be a residual risk to the site associated with a breach of the tidal defences with depths up to 1.0m. It is however considered that if the finished floor level was raised 1.0m above the existing ground level this would have an unacceptable impact on neighbouring properties and the street scene/locality. From the FRA it is therefore recommended that the finished floor levels be set at 0.4m above surrounding ground level with there being 0.6m of flood resistant construction and 0.9m of flood resilient construction above finished floor level to further accommodate the risk of flooding with the need for the FFL to be slightly lower than recommended. Furthermore, the impact from this flooding can also be considered to be lowered due to the two storey/chalet nature of the proposed property as this will provide habitable sleeping accommodation away from the ground floor should flooding occur. A condition will be imposed on this outlie application should it be approved to ensure that at the reserved matters stage a design for a bungalow cannot be submitted.

Overall, when considering the development on balance, it is considered that given the mitigation measures detailed and recommended by condition, it is considered that the proposal accords with Policies 2, 3 and 4 of the South East Lincolnshire Local Plan and the intentions of the National Planning policy Framework in this regard.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development within the defined settlement boundary. The development hereby proposed is acceptable in principle does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the South East Lincolnshire Local Plan and the provisions of the National Planning policy Framework when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act

B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).

C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking into consideration these factors, the proposal is considered to comply with Policies 1, 2, 3, 4, 10, 11, 28, 30 and 36, along with Appendix 6, of the South East Lincolnshire Local Plan (SELLP), 2019; in addition to the identified sections contained within the National Planning Policy Framework (NPPF) (December 2023). Notwithstanding the aforementioned minor conflicts, there are no significant factors in this case that would outweigh the benefits of the proposal; therefore, in considering all the matters raised above the planning balance is in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
