Your ref: H11-0383-23

Site name/Description: Land off Lime Walk Long
Sutton Spalding PE12 9HG

Summary of Proposal: Modification of
Condition 11 of H11-1264-18 to allow for a
temporary access road into the site for
construction traffic.

Dear Sir/Madam

The Board has been made aware of the above application and wishes to make the following comments.

The 'Site Compound Plan' (4149/300, HA architectural Services) submitted with this application shows a temporary access road over the Board's culverted watercourse in the Northern corner of the development site. To enable this proposal, consent would be required under the Board's Byelaw 10 (No works within 9m of the edge of drainage or flood risk management infrastructure). **It is unlikely that the Board would approve an application for these works therefore the Board currently objects to this proposal.**

Furthermore, this culverted watercourse is also owned by the Board and the Board were not notified of the proposed works, nor is any agreement in place regarding the proposed temporary access road on the Board's land title.

Please see the supplementary information overleaf for further detail on the Board's policy and consenting process.

If, following review of our comments and supporting policy documents linked below, you wish to discuss any of the requirements I have raised, please contact the Board using the details at the head of this letter.

Yours sincerely,

Cathryn

Planning and Byelaw Strategy

The Board's Planning and Byelaw Strategy seeks to provide:

- Guidance on how (and why) the Board will review and comment on planning applications.
- Information on the policies against which the Board will assess and determine applications.
- Guidance to riparian (waterside) landowners regarding watercourse maintenance.

The Planning and Byelaw Strategy can be found via the following link:

https://www.wlma.org.uk/uploads/WMA_Planning_and_Byelaw_Policy.pdf

Arterial Watercourses

Maps on the Board's website show which watercourses are designated as Arterial Watercourses by the Board. You may also have heard these watercourses referred to as 'Main Drains' or 'Maintained Watercourses'. The designation is an acknowledgement by the Board that the watercourse is of arterial importance to the Internal Drainage District and as such will normally receive maintenance from the IDB using the Board's Permissive Powers. Although the Board opts to proactively maintain this arterial network, there is no change in the ownership or liability associated with the watercourse resulting from this designation.

Why we have commented on this application:

By engaging with the planning process the Board is seeking to:

- Reduce flood risk to communities within the Internal Drainage District
- Promote sustainable development in sustainable locations by supporting sound planning decisions in accordance with the National Planning Policy Framework (especially [Paragraph 167](#)) and the [Non-standard technical standards for SuDS](#).
- Reduce the potential for conflict between the planning process and the Board's regulatory process.

For further information please refer to the Board's Planning and Byelaw Strategy.
