Shorter heights
and custom widths
available to order

Raised front lip
Rainwater guided
sideways to stop the
drips down your neck

Registered Design No. 4022345

Product information

Our solid steel Scoop door canopy is hot dip zinc galvanized before painting matt Black or Grey, or can be Aged to achieve a mellow zinc patina that looks like a lead roof. We can reduce the 19" high roof to 12.5" if there is limited height above your door. The roof has a front lip to guide rainwater sideways.

Our black painted Scoop door canopy looks exactly how we visualised it and we're very pleased with the product quality and finish.

Mr S. Knight, Suffolk
