report on findings about the Arctic. As detailed herein, the resulting high-resolution map was used to identify and document the locations of the 100 most vulnerable coastal communities in the Arctic region. The map was also used to identify the coastal communities that are most vulnerable to sea level rise, and the coastal communities that are most vulnerable to sea level rise. The map was also used to identify the coastal communities that are most vulnerable to sea level rise, and the coastal communities that are most vulnerable to sea level rise. The map was also used to identify the coastal communities that are most vulnerable to sea level rise, and the coastal communities that are most vulnerable to sea level rise.
