

Application is for a dog walking field for hire by the hour. Fully enclosed with 6ft fencing so they can be let off the lead to run with no fear of the dog/dogs being able to escape. Some obstacle such as jumps will be within the area. A customer will hire the field on a time slot they choose. It would mostly be one customer at a time but i'd allow two people with their dogs on at the same time with a maximum of 5 dogs on the field at any one time. So if the whole day sold out there would be a maximum of two cars entering the field every hour unless it is hired out for more than one time slot. There will be gravelled flooring near the entrance for parking within the gated enclosure.

Fence will be 6ft high wooden posts with mesh between. There will be board 1ft deep into the ground to prevent digging out. The main entrance will join onto an existing wide driveway so no new entrance on to the road will need to be created. Motion sensor spotlights will be around the premises for darker winter evenings, so will only be on if someone is there. They will be fully turned off at night to not cause any light pollution.

Bins will be placed on the premises for dog waste etc. There will be a locked entrance at the back of the enclosure for easier access off our other fields for tractors to grass cut. All groundskeeping and pest control will be carried out by myself. It would be open every day 6am - 8pm. Land owners have agreed. I would be the only employee.
