G01 New external lintels along the rear elevation to be Catnic CN7E externally combined with 100x100mm Prestressed Concrete Lintels internally.

G02 *Internal overhead lintels to be 2No 100x150mm Prestressed Concrete Lintels.*

G03 Cross beam 152x152x23 UC on 225x340mm padstone at one end and cleated bolted connection into the steel at other end.

G04 Main overhead steel beam 152x152x37 UC on 225x340mm padstones at each end.

G05 New concrete floor slab to be 150mm thick concrete with A142 mesh reinforcement top (35mm cover).

101 Along full length of the ridge provide a 152x152x23 UC steel beam supported off 225x340mm padstone at one end and internal steel post at other end. The ridge beam to continue across full length of the building, over the internal 'box frame' as indicated.

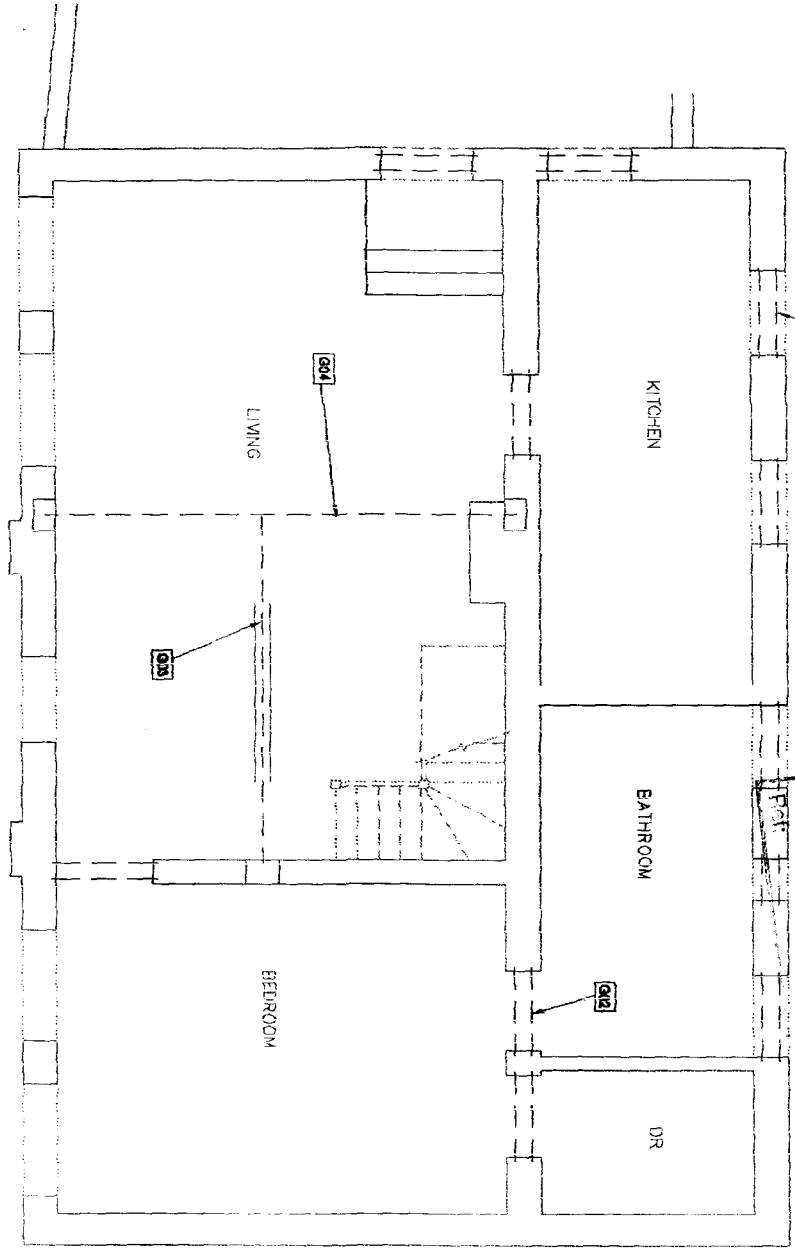

102 *New floor joists spanning as indicated 50x175mm @ 400mm c/c.*

103 Provide a 80x80x5SHS steel post concealed within the internal stud wall on first floor. End plates 150x150x12mm top and bottom.

104 Within the internal stud partition wall, provide an 'inverted U' box frame to further detail, to provide lateral stability tot he main longitudinal reidge steel beam. Box frame to be fabricated in 80x80x5 SHS steel section with bottom end plates 150x150x12mm.
