

Main Bargeboard Patterns

The Roofstyle bargeboard system can be fixed onto the face of the bargeboard or directly onto the first rafter and works equally well with horizontal, inclined or open soffits.

We illustrate a selection of designs, however, you can easily design your own individual styling.

Patterns at the Bargeboard Apex

A variety of patterns can be cut at the bargeboard apex.

Here we illustrate the system fixed over a bargeboard as a face decoration and also direct onto the first rafter to become a decorative bargeboard.

Plain mouldings at the apex can be useful in achieving a balanced overall design.
