When the results of the study are taken into account, the authors conclude that the use of the Atrial Fibrillation Screening System on the sailing ship's passengers was not a cost-effective use of resources. The authors also note that the screening of the passengers was not a cost-effective use of resources because the screening of the passengers was not a cost-effective use of resources. The authors also note that the screening of the passengers was not a cost-effective use of resources because the screening of the passengers was not a cost-effective use of resources.
