Ref: 0071/08

NOTES

1. All existing mature tree and hedge cover on and around site to be preserved and retained.
2. Planting of indigenous broadleaved trees and shrubs proposed around and within the body of the site. Trees and shrubs will be planted away from the water's edge to minimise problems of leaf fall and shading.
3. Lakebed to be maximum depth 3 metres feathered out to the shallows to facilitate fish spawning. Native rushes and sedges to be planted at lake edge and on islands to create natural cover and wildlife habitats.
4. New lakes to have 6-inch diameter concealed overflow pipe to adjacent dyke.
5. Access paths to be constructed around the lakes linking to existing caravan parking areas. Surfacing to be crushed stone or otherwise to be agreed by the Local Planning Authority. Wheelchair accessible fishing pegs (timber) to be positioned around the lakes.
