The proposed development is in an area of archaeological interest, but the works required are unlikely to involve substantial ground disturbance and therefore it is likely that there would be no archaeological impact.

Proposals to commemorate this event in the village's wartime history could enhance the village green and better reveal the area's significance in accordance with the Government's objectives for the historic environment within section 16 of the NPPF. That is subject to any proposed design meeting the requirements of the local planning authority from a conservation perspective.
