

Application for Works to a Protected Tree(s)

Description:

Application to carry out works to a Norway Spruce (identified as T2 of Long Sutton Tree Preservation Order No. 13 1989), located in the front garden of 44A Gedney Road Long Sutton, adjacent to the eastern boundary.

- Remove 'piggy back branches', branches which rest on lower ones, to reduce overall canopy.
- Remove stumps of previously damaged/lopped branches.
- Reduce lower branches by approximately 0.75 metres on the eastern side of the tree overhanging 44 Gedney Road.
- Shorten higher branches to keep shape correct on the eastern side of the tree overhanging 44 Gedney Road, so that it is wider at the bottom than the top, so reduction to be incremental to retain the overall shape of the tree.

The works are to reduce the overhang onto 44 Gedney Road and also to reduce the risk of further branches breaking due to extremes of weather.
