CASE OFFICER ASSESSMENT

Proposal

This is a full application seeking permission for a proposed field access at land adjacent to 60 South Drove, Lutton Marsh.

Site Description

The site is located outside any defined settlement boundary and is therefore in the open countryside as outlined in the South East Lincolnshire Local Plan, 2019 (SELLP).

History

No relevant planning history.

Consultation Responses

South Holland Internal Drainage Board

Consent is not currently required under Byelaw 3 and is not applicable under Byelaw 10. Consent is however required under Section 23.

Environment Agency

No objection.

Lincolnshire County Council Highways

Recommendation:

Approve with conditions

Comments:

The application is for a proposed field access. Visibility is in accordance with Manual for Streets. They will need to culvert the watercourse - to enable this proposal consent is required under Section 23 of the Land Drainage Act 1991 (and Byelaw 4) and I recommend that the applicant contacts South Holland Internal Drainage Board to make an application for
this consent at their earliest convenience. The access will be constructed to Lincolnshire County Council Specification.

As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to drainage and surface water flood risk on all Major applications. This application is classified as a Minor Application and it is therefore the duty of the Local Planning Authority to consider the surface water flood risk and drainage proposals for this planning application.

Planning Conditions:

In the event that permission is to be given, the following planning conditions should be attached:

Highway Condition 13

Before the access is brought into use all obstructions exceeding 0.6 metres high shall be cleared from the land within the visibility splays illustrated on drawing number 079A-P01-A dated 06/12/24 and thereafter, the visibility splays shall be kept free of obstructions exceeding 0.6 metres in height.

Reason: So that drivers intending entering the highway at the access may have sufficient visibility of

approaching traffic to judge if it is safe to complete the manoeuvre.

Informatives

Highway Informative 03

The permitted development requires the formation of a new/amended vehicular access. These works will require approval from the Highway Authority in accordance with Section 184 of the Highways Act. Any traffic management required to undertake works within the highway will be subject to agreement. The access must be constructed in accordance with a current specification issued by the Highway Authority. Any requirement to relocate existing apparatus, underground services, or street furniture because of the installation of an access will be the responsibility, and cost, of the applicant and must be agreed prior to a vehicle access application. The application form, costs and guidance documentation can be found on the Highway Authority's website, accessible via the following link: https://www.lincolnshire.gov.uk/licences-permits/apply-dropped-kerb.

Key Planning Considerations

The main issues and considerations in this case are (but are not limited to):
- Principle of Development and Sustainability
- Layout, Design, and Impact on the Character of the Area
- Impact on Neighbouring Residents/Land Users/Land Uses
- Highway Safety and Parking
- Flooding Risk Considerations and Drainage
- Biodiversity

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above .

The policies and provisions set out in the National Planning Policy Framework (updated December 2024) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Furthermore, where a Neighbourhood Plan has been adopted, this alongside the adopted Local Plan, forms part of the Development Plan for the District, and must be considered when assessing development proposals. In this instance, no relevant neighbourhood plans have been adopted.

Planning Considerations

Principle of Development and Sustainability

The South East Lincolnshire Local Plan (2019) sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan (2019) sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan (2019) indicates that within Main Service Centres, development will be permitted that supports their role as a service centre for the settlement itself, helps sustain existing facilities or helps meet the service needs of other local communities.

The application site in this instance is outside any defined settlement boundary and is therefore in the open countryside as detailed by Policy 1. Following on from this, the proposal does not relate to works to an existing and established residential dwelling. Regardless of such, it does relate to a small farm area to the rear of where the access will be, following on from the officers site visit it was clear there were farm animals parallel to where this new access would be. Therefore, the principle of such development is considered to be appropriate, comprising an appropriate form of development for the location.

As such, the proposal is considered to be acceptable with the requirements of the South East Lincolnshire Local Plan (2019) when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, and impact on highway safety, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2024) specifically relates to 'Achieving well-designed places' and details that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2024), states that new development should function well and add to the overall quality of the area (beyond the short term and over the lifetime of the development) and should be visually attractive as a result of good architecture, layout and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan (2019) outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework (December 2024), in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework (December 2024) and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The front section directly abutting the highway would be concrete with an area of around 24sqm leading onto a dropped kerb. To the rear of this, there would a grass area with post and wire fencing on either side to match the existing. Finally, a single metal field gate would be the barrier into the site. The metal gate would have a height of 1200mm and a width of 4700mm, where as the post and wire fencing would have a height of 1200mm and a width of 1830mm.

The layout, design, and size is all considered to be acceptable and would not cause any material harm to the street scene or locality.

Taking account of the design, scale and nature of the development, as detailed above, the proposal

is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the South East Lincolnshire Local Plan (2019) and Section 12 of the National Planning Policy Framework (December 2024).

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2024) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

Due to the nature of the development, there would be no overlooking or overshadowing. It is of a small scale also so should not appear overbearing in any case either. Naturally, after the initial construction, which itself would take place over a short period, minimal additional noise pollution would be caused as a result of the development and the neighbour should not be greatly harmed through an increase in noise.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2024), and Policies 2 and 3 of the South East Lincolnshire Local Plan (2019).

U]Flood Risk and Drainage

Section 14 of the National Planning Policy Framework (December 2024) explains that "Inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere".

This goes on to state, within Paragraph 172, that all plans "should apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: a) applying the sequential test and then, if necessary, the exception test as set out below".

Paragraph 173 of the National Planning Policy Framework (December 2024) goes on to state that "A sequential risk-based approach should also be taken to individual applications in areas known to be at risk now or in future from any form of flooding", by following the steps set out within Section 14 of the National Planning Policy Framework (December 2024).

Paragraph 174 goes on to state that, "Within this context the aim of the sequential test is to steer new development to areas with the lowest risk of flooding from any source. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding", with the strategic flood risk assessment being the tool to demonstrate this.

Paragraph 175 details that "The sequential test should be used in areas known to be at risk now or in the future from any form of flooding, except in situations where a site-specific flood risk assessment demonstrates that no built development within the site boundary, including access or escape routes, land raising or other potentially vulnerable elements, would be located on an area that would be at risk of flooding from any source, now and in the future (having regard to potential changes in flood risk)".

If, following the application of the Sequential Test, it is not possible, consistent with wider sustainability objectives, for the development to be located in Zones with a lower probability of

flooding, the Exceptions Test can be applied if appropriate.

The site lies within Flood Zones 3 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan (2019) is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the South East Lincolnshire Strategic Flood Risk Assessment (2017) as a basis to apply the sequential test.

The proposal is for a field access, it will be formed in such a way that surface water will not drain onto the highway nor give rise to detrimental surface water flooding elsewhere. Due to it solely relating to a field access, if any defences were breached, the proposal would not cause or heighten risk to health or life.

Overall, when considering the development on balance, it is considered that given the mitigation measures detailed and recommended by condition, the proposal accords with Policies 2, 3 and 4 of the South East Lincolnshire Local Plan (2019) and the intentions of the National Planning Policy Framework (December 2024) in this regard.

Highway Safety and Parking

Section 9 of the National Planning Policy Framework (December 2024) specifically relates to 'Promoting sustainable transport'. Paragraph 116 of the National Planning Policy Framework (December 2024) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

The new access is in relation to a separate full planning application for the conversion of adjacent barns. The applicant has purchased the barns and part of the agreement is the formation of a separate field access at this location. The field access would create a better and more suitable way of entering and exiting the site and should ensure less dirt etc is dragged onto South Drove. Lincolnshire County Council were consulted on the application and stated the following 'The application is for a proposed field access. Visibility is in accordance with Manual for Streets. They will need to culvert the watercourse - to enable this proposal consent is required under Section 23 of the Land Drainage Act 1991 (and Byelaw 4) and I recommend that the applicant contacts South Holland Internal Drainage Board to make an application for this consent at their earliest convenience. The access will be constructed to Lincolnshire County Council Specification'. No objections have been raised with a condition recommended to be applied, should the application be approved this would be attached.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Policies 2, 3 and 36 the South East Lincolnshire Local Plan (2019), and Section 9 of the National Planning Policy Framework (December 2024).

Biodiversity Net Gain

Schedule 7A of the Town and Country Planning Act 1990 (inserted by the Environment Act 2021) requires developers to deliver a minimum of 10% Biodiversity Net Gain using standardized biodiversity units measured by statutory biodiversity metrics. This is often referred to as the mandatory requirements for Biodiversity Net Gain.

"Under the statutory framework for biodiversity net gain, subject to some exceptions, every grant of planning permission is deemed to have been granted subject to the condition that the biodiversity gain objective is met ("the biodiversity gain condition"). This objective is for development to deliver at least a 10% increase in biodiversity value relative to the pre-development biodiversity value of the onsite habitat. This increase can be achieved through onsite biodiversity gains, registered offsite biodiversity gains or statutory biodiversity credits".

The biodiversity gain condition is a pre-commencement condition. This relates to a condition that seeks, once planning permission has been granted, a Biodiversity Gain Plan that must be submitted and approved by the planning authority before commencement of the development, alongside the need to submit a Habitat Management and Monitoring Plan.

The effect of Paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission is deemed to have been granted subject to the "biodiversity gain condition". The effect of this "biodiversity gain condition" is that development granted by this notice must not begin unless:
(a) a Biodiversity Gain Plan has been submitted to the planning authority, and
(b) the planning authority has approved the plan, or
(c) the development is exempt from the biodiversity gain condition.

For applications that are submitted prior to the introduction of this requirement, the development would exempt from the mandatory 10% requirement and as such, the Biodiversity Gain Condition would not apply. However, this application was submitted following the introduction of this legislation. As such, unless comprising development that is exempt from this mandatory Biodiversity Net Gain (10%), a condition would be required, as mandatorily set.

When taking the above into account, the development in this instance is exempt from the statutory 10% Biodiversity Net Gain requirements. Their accompanying statement outlines that the extent of the proposal effects less than 25 square metres of on-site habitat and less than a 5 metre linear length of habitats such as hedgerows. Due to the minimal works being carried out it is considered the application is exempt from the need for BNG due to this.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development outside the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate access, whilst conforming with the South East Lincolnshire Local Plan (2019) and the provisions of the National Planning Policy Framework (December 2024) when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share

a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking the above considerations into account, the proposal is considered to be in accordance with Policies 1, 2, 3, 4, 28 and 36 (including Appendix 6) of the South East Lincolnshire Local Plan (2019), along with the identified sections contained within the National Planning Policy Framework (NPFF) (December 2024). The are no significant factors in this case that indicate against the proposal and outweigh the consideration in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
