Dear sir,

SUBMITTED ON-LINE

RE: Installation of Wind Turbine and Ancillary Works plus Temporary Anemometry Mast

Please find attached our completed application seeking Discharge of Conditions following the grant of Full Planning Consent under reference H13-1558-07.

It is considered the submitted details are self-explanatory and relate directly to those conditions referred to in the application form. A helpful pre-application discussion with David Gedney covered a number of issues including the nature, location and extent of the landscaping. It was agreed that, given the scale and position of the turbine, new planting would be pointless at that location. It was concluded however, landscaping could be introduced at the access track/Eugate Road junction and the drawings supporting the application show this.

I hope all will be found acceptable and I look forward to responding to any comments you may have; if in the meantime you require any further information please feel free to call me at any time.

Yours faithfully,

Antony Pettifer
