David

With regard to your recent emails below to Andy, please find attached our updated planning drawings *'18114-51A & 52A'* for the advertisement signs at Naylor Farms, Roman Bank as well as the manufactures details for the advertisement sign 1.

With respect to Advertisement Sign 2, we have amended our plans to reflect the sign that is currently installed - there is no replacement for this sign.

The palisade fence that has been installed is a 2.4m high fence, however due to the ground levels the fence was needed to be stepped in 2 locations. This has been incorporated into our elevations drawing ref *'18114-43'*, which clearly identifies the two 300mm steps in the fence and therefore as you have stated will vary in height between 2.4m and 2.7m approximately.

Hopefully this clears the outstanding issues although if you have any further queries please feel free to contact either Andy or myself.

Kind regards

Aaron Shepherd

Dear Mr Richardson,

I write further to my email dated 17 March 2015 (see below) and look forward to a response within the next 7 days.

If I do not hear from you within the specified period the following will be assumed:

1) The fencing (ref H13-0212-15) is retrospective and for fencing varying in height between 2.3m and 2.6m approximately;
2) In respect of H13-0213-15, sign 2 on the submitted plan (Dwg. no. 18114/52) will replace the sign currently in situ.

Regards.

David Gedney

Dear Mr Richardson,

I have a couple of queries in relation to the above applications.

Fascia signs – Sign 2 appears to differ from the sign currently in situ. Will it replace the latter? If not, amended plans will be required.

Pallisade fencing – The application indicates that the fencing is 2.4m in height. However, on site it varies in height between approximately 2.3m and 2.6m due to varying ground levels. The description will therefore be revised to reflect this unless you indicate otherwise.

I look forward to your response in respect of the above in due course.

Regards.

David Gedney
