CASE OFFICER ASSESSMENT

Description of Proposal

This is a full planning application for the relocation of a hay store within the equestrian plot on land to the east of Church Lane Moulton. The store, originally approved under H13-0911-15, would be relocated approximately 22m to the west, so that it would be adjacent to the other equestrian buildings.

Site Description

The proposed building is located outside of any settlement boundaries outlined within the South East Lincolnshire Local Plan, 2019. The site is occupied by a private equestrian use. Agricultural fields surround the site. The access is taken off of Church Lane Moulton, which is a residential area of Moulton.

Relevant History

H13-0911-15 - Full - Change of use of land from agricultural to equestrian (recreational), retrospective permission for three field shelters and permission for the erection of a hay store and green container - retrospective - Approved 14-12-15

Consultation Responses

The responses received from consultees during the initial consultation exercises, which can be viewed in their entirety through the South Holland website, can be summarised as follows:

SELCP Ecologist

Summary: There has been sufficient evidence provided regarding BNG for this application, and we are confident that 10% net gain will be achieved onsite for this application. We require further photographic evidence to assess impacts to protected species to be provided pre-determination.

Ecological Considerations:
- We believe that this site could be of importance to some protected species. Therefore, in the interest of transparency, we request that: photographs of the interior/exterior of any buildings onsite, and brief description of site, and use/activities on the site, be provided to the authority pre-determination so we can carefully evaluate whether we would require further survey work to be provided in order to limit any potential impacts on protected species.

BNG Comments and Notes to applicant:
- We are satisfied with the Biodiversity gain plan provided for this application.
- Overall, the biodiversity assessment and metric calculations appear rigorous, and we can have confidence in their conclusions. In this case the metric indicates that 10% mandatory net gain can be achieved on-site with a predicted overall gain of 10.98% in Habitat units.

South Holland Internal Drainage Board

Thank you for your consultation on planning application H13-0219-26. Having screened the application, whilst the
site in question lies within the Internal Drainage District of the South Holland Internal Drainage

Board, the proposed
application does not meet our threshold for commenting as per our Planning and Byelaw Strategy. Therefore, the
Board has no comments to make.

Conservation Officer

We have no objection to this proposal on built heritage grounds.
The structure already exists and its relocation closer to the existing stables would not result in any additional harm to the setting of the listed buildings, namely The Goddards, the Church of All Saints, and Moulton Windmill

Highway and Lead Local Flood Authority

No objection - This proposal is for the relocation of a hay store, and the access arrangements remain unchanged; therefore, it is considered that the proposals would not result in an unacceptable impact on highway safety.

Environmental Protection

No comments

Public Representations

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, no letters of representation have been received.

Key Planning Considerations

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019 (SELLP), is the development plan for the district, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework, 2024 (NPPF) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Principle of Development

Policy 1 of the SELLP sets out the settlement hierarchy in respect of delivering sustainable development, which meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local need, whilst making more sustainable use of land, and to minimise the loss of high-quality agricultural plots by developing in sustainable locations and at appropriate densities.

Policy 1 expresses this sustainable hierarchy of settlements, ranking the settlements deemed to be most sustainable in descending order. The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy are areas of limited development opportunity including Minor Service Centres, with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location.

The relevant area of the site is located outside of any of the settlement boundaries outlined in the SELLP, and can therefore be considered to be within the countryside. In this context, Policy 1 states:
"In the Countryside development will be permitted that is necessary to such a location and/or where it can be demonstrated that it meets the sustainable development needs of the area in terms of

economic, community or environmental benefits".

The proposal solely relates to works with an established equestrian plot. The proposal would not result in an extension of this use, or additional expansion into the countryside.

As such, the proposal is considered to be in accordance with the requirements of the SELLP when viewed in principle. This is subject to the assessment against site specific criteria; including (but not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, and impact on highway safety, which are discussed in turn in the following sections.

Layout, Design, Scale and Consideration of the Character of the Area

Section 12 of the NPPF, "Achieving well-designed places", states that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the NPPF, states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality, to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing. Developments should create places that are safe, inclusive, and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the SELLP outlines sustainable development considerations for proposals; providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 of the SELLP requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the NPPF and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable. Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design, and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The proposal relates to the relocation of a store. On this basis, there not be a significant impact, as the quantity of development unchanged. Moreover, in moving the development closer to the other buildings, a more open character is created within the wider site, creating a benefit.

In any event, the proposed building is small, and commensurate to the plot and built form. The development is typical of rural store buildings.

Taking account of the design, scale, and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the SELLP and Section 12 of the NPPF.

Impacts Upon Resident Amenity

Paragraph 135 of the NPPF states that development should create places that are safe, inclusive, and accessible and which promote health and well-being, with a high standard of amenity for existing and future users.

Policies 2 and 3 of SELLP sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

The location and nature of development would mean that there would be no additional amenity impacts.

As detailed above, the scale and design of the proposal is considered to have no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with Section 12 of the NPPF and Policies 2 and 3 of the Local Plan in terms of impact upon residential amenity.

Highway Safety and Parking

Section 9 of the NPPF is titled 'Promoting sustainable transport'. Within this, Paragraph 116 advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal. Policy 33 further reinforces the need for developments to be accessible via sustainable modes of transport.

Policy 36 of the SELLP, in conjunction with Appendix 6, sets out minimum vehicle parking standards.

The proposal would not alter the existing access or parking arrangements for the site. Therefore, the development would have no impact or material affect upon off street parking or upon highway conditions from either a safety or capacity perspective.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Policies 2, 3, 33 and 36 of the SELLP, as well as Section 9 of the NPPF.

Flooding Considerations

Section 14 of the NPPF requires development plans to "apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: (...) applying the sequential test and then, if necessary, the exception test as set out below".

Paragraph 174 of the NPPF states "the aim of the sequential test is to steer new development to areas with the lowest risk of flooding from any source. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding". The strategic flood risk assessment provides the basis for applying this test.

Paragraph 175 of the NPPF states that "the sequential test should be used in areas known to be at risk now or in the future from any form of flooding, except in situations where a site-specific flood risk assessment demonstrates that no built development within the site boundary, including access or escape routes, land raising or other potentially vulnerable elements, would be located on an area that would be at risk of flooding from any source, now and in the future (having regard to potential changes in flood risk)."

If, following the application of the Sequential Test, it is not possible, consistent with wider sustainability objectives, for the development to be located in zones with a lower probability of flooding, the Exceptions Test can be applied if appropriate. The process for applying the Exception Test is outlined within Paragraphs 177, 178 and 179 of the NPPF. Paragraph 178 states "to pass the exception test it should be demonstrated that: a) the development would provide wider sustainability benefits to the community that outweigh the flood risk; and b) the development will be safe for its lifetime taking account of the vulnerability of its users, without increasing flood risk elsewhere, and, where possible, will reduce flood risk overall"

The site lies within Flood Zones 1 and 3 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South-East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan, including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the SELLP is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the SFRA as a basis to apply the sequential test.

Within the SFRA the site is outside of any identified hazard zone.

The proposal relates to a reorganisation of an existing and established use. The relevant development is entirely within flood zone 1. On this basis, there would be no wider flood risk implications.

Overall, when considering the development on balance, it is considered, given the mitigation measures detailed and recommended by condition, that the proposal accords with Policies 2, 3 and 4 of the SELLP and the intentions of the NPPF with regards to flood risk.

Biodiversity Net Gain

Schedule 7A of the Town and Country Planning Act 1990 (inserted by the Environment Act 2021) requires developers to deliver a minimum of 10% Biodiversity Net Gain using standardized biodiversity units measured by statutory biodiversity metrics. This is often referred to as the mandatory requirements for Biodiversity Net Gain.

"Under the statutory framework for biodiversity net gain, subject to some exceptions, every grant of planning permission is deemed to have been granted subject to the condition that the biodiversity gain objective is met ("the biodiversity gain condition"). This objective is for development to deliver at least a 10% increase in biodiversity value relative to the pre-development biodiversity value of the onsite habitat. This increase can be achieved through onsite biodiversity gains, registered offsite biodiversity gains or statutory biodiversity credits".

The biodiversity gain condition is a pre-commencement condition. This relates to a condition that seeks, once planning permission has been granted, a Biodiversity Gain Plan that must be submitted and approved by the planning authority before commencement of the development, alongside the need to submit a Habitat Management and Monitoring Plan.

The effect of Paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission is deemed to have been granted subject to the "biodiversity gain condition". The effect of this "biodiversity gain condition" is that development granted by this notice must not begin unless:
(a) a Biodiversity Gain Plan has been submitted to the planning authority, and
(b) the planning authority has approved the plan, or
(c) the development is exempt from the biodiversity gain condition.

The biodiversity information provided has demonstrated that net gain can be achieved on site.

A query has been raised by the SELCP ecologist relating to protected species, requesting photographs of any buildings on site. Whilst this is noted, the building in question is no longer present on site, having recently collapsed. On this basis, the requested photographs would not act as evidence of potential occupation by protected species. As a result, it is considered unnecessary to provide this information; particularly given the powers of the wider legislation with regards to

protected species.

Heritage and Conservation

The entrance to site lies within Moulton Conservation Area, although there is limited interaction between the entrance and the actual site of development here.

In respect of any buildings or other land in a conservation area, special attention must be paid to the desirability of preserving or enhancing the character or appearance of that area, through Section 72 the Planning (Listed Buildings and Conservation Areas) Act 1990.

The NPPF expresses the importance of considering the impact of development on the significance of designated heritage assets; advising that development and alterations to designated assets and their settings can cause harm. These policies ensure the protection and enhancement of the historic buildings and environments. Proposals that preserve those elements of the setting that make a positive contribution to or better reveal the significance should be treated favourably.

Section 16 of the NPPF states that "When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial harm, total loss or less than substantial harm to its significance".

Paragraph 220 expands upon this, in relation to Conservation Areas, stating:
"Not all elements of a Conservation Area or World Heritage Site will necessarily contribute to its significance. Loss of a building (or other element) which makes a positive contribution to the significance of the Conservation Area or World Heritage Site should be treated either as substantial harm under paragraph 214 or less than substantial harm under paragraph 215, as appropriate, taking into account the relative significance of the element affected and its contribution to the significance of the Conservation Area or World Heritage Site as a whole".

Policy 29 (The Historic Environment) states amongst other matters that the distinctive elements of the South East Lincolnshire historic environment will be conserved and, where appropriate, enhanced, in keeping with the policies in the NPPF. Development proposals will be expected to conserve and enhance the character and appearance of designated and non-designated heritage assets.

Policy 29B, relating to conservation areas, states: "Proposals within, affecting the setting of, or affecting views into or out of, a Conservation Area should preserve (and enhance or reinforce, as appropriate) features that contribute positively to the area's character, appearance and setting. Proposals should:
1. Retain buildings/groups of buildings, existing street patterns, historic building lines and ground surfaces;
2. Retain architectural details that contribute to the character and appearance of the area;
3. Where relevant and practical, remove features which are incompatible with the Conservation Area;
4. Retain and reinforce local distinctiveness with reference to height, massing, scale, form, materials and plot widths of the existing built environment;
5. Assess, and mitigate against, any negative impact the proposal might have on the townscape, roofscape, skyline and landscape;"

To this end, all proposals in the Conservation Area or which affect listed buildings should preserve or enhance their settings.

Due to the nature of the proposal, there would be no impact upon the Conservation Area. Whilst a small element of the site is within the Area, the actual area of development would have little to no interaction with the Conservation Area nor adversely impact upon its setting or significance. On that basis, the proposal would preserve the area.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development within an established equestrian site. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the SELLP and the provisions of the NPPF when viewed as a whole.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking these factors into consideration, the proposal is considered to comply with Policies 1, 2, 3, 4, 28, 29, 33 and 36 of the SELLP, as well as Sections 9, 12, 14 and 16 of the NPPF. There are no significant factors in this case that would outweigh the benefits of the proposal; therefore, the planning balance is in favour of the proposal.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
