CASE OFFICER ASSESSMENT

Proposal

This is a householder application seeking permission for a proposed extension and alterations at 49 Ashby Gardens, Moulton.

Site Description

The site is located within the defined settlement boundary of Moulton as outlined in the South East Lincolnshire Local Plan, 2019 (SELLP). The dwelling is down a cul-de-sac of Ashby Gardens and comprises a two-storey dwelling, constructed from brickwork with a tiled roof and white uPVC windows.

To the rear of the site there is a large farming field located outside the settlement.

History

H13-0478-08 - Proposed conservatory to rear of dwelling - Approved

Consultation Responses

Lincolnshire County Council Highways Authority

No Objections.

Having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed development would not be expected to have an unacceptable impact upon highway safety or a severe residual cumulative impact upon the local highway network or increase surface water flood risk and therefore does not wish to object to this planning application.

Comments:

The proposal is for extensions and alterations that will increase the bedrooms from 4 to 5. The garage has already been converted to store and playroom and this will now be a cinema room. The proposal will not have an adverse impact on the public highway. As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to drainage and surface water flood risk on all Major applications. This application is classified as a Minor Application and it is therefore the duty of the Local Planning Authority to consider the surface water flood risk and drainage proposals for this planning application.

South Holland Internal Drainage Board

No comments.

Key Planning Considerations

The main issues and considerations in this case are (but are not limited to):

- Principle of Development and Sustainability
- Layout, Design, and Impact on the Character of the Area
- Impact on Neighbouring Residents/Land Users/Land Uses
- Highway Safety and Parking

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework (December 2023) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Planning Considerations

Principle of Development and Sustainability

The South East Lincolnshire Local Plan (2019) sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan (2019) sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan (2019) indicates that within Main Service Centres, development will be permitted that supports their role as a service centre for the settlement itself, helps sustain existing facilities or helps meet the service needs of other local communities.

The application site in this instance is in Moulton as detailed by Policy 1. Regardless of such, the proposal solely relates to the extension of an existing and established residential dwelling and therefore, the principle of such development is considered to be appropriate, comprising an appropriate form of development for the location.

As such, the proposal is considered to be acceptable with the requirements of the South East Lincolnshire Local Plan (2019) when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, and impact on highway safety, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2023) specifically relates to 'Achieving well-designed and beautiful places' and details that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2023), states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework, in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The proposal comprises a single storey extension to the rear, which would protrude by approximately 5450mm with a total length of 14200mm and a height of 2800mm. This would be a flat roof design which are commonly not favourable to the LPA in most cases; however, as it would be to the rear and therefore not visible from the highway or public vantage points, it is considered to be acceptable in this instance. Overall, the single storey rear extension when viewed on its own is acceptable and proportionate to the host property and has no material concerns against it.

On the first floor, the proposed extension projects from the side elevation by around 5150mm and would have a length of 12200mm and finally a rear width of 6300mm. The height of the extension would be level to the existing ridge and eaves sitting at 6500mm and 4900mm, respectively.

The first floor addition is considered to be of a notable size and, in the opinion of the Local Planning Authority, may not typically be viewed as being appropriate. However, it must be noted that an extension of a similar design was approved under H13-1030-93 for 27 Ashby Gardens, a property located within the wider vicinity, sited within a nearby cul-de-sac.

Upon further investigation, the design in this instance is very similar to this previous application, which was subsequently approved and has now been constructed. Therefore, the LPA consider that it would be challenging to resist such a proposal; although there would be a clear visual alteration.

The materials of the extension would match the existing host property throughout which ensures that it would appear in keeping and in character with both the main dwelling and surrounding area it is located within.

Overall, the proposed development, although sizeable, is not considered to be such that an unacceptable impact would occur that would warrant refusal in this case

Some internal alterations are proposed alongside the proposed extension, this includes (but is not limited to) two offices being created in place of the existing dining room with the play room and storage adjacent to this being converted into a cinema room. Further within the dwelling the kitchen/utility will be opened up more and will be open plan with the rear extension which operates as a snug, dining area and sitting area. To the first floor two new bedrooms will be introduced within the extension both featuring en-suites with bedroom 1 also having a dressing room and outdoor sitting area accessed via bi-fold doors. These alterations are considered suitable and not all of them necessarily require planning permission but have been included within the plans and therefore mentioned within the report.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with policies 2 and 3 of the South East Lincolnshire Local Plan and Section 12 of the National Planning Policy Framework (December 2023).

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2023) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

The proposed two storey and single storey extension is not considered to give rise to an

unacceptable impact to the residential amenities of neighbouring occupiers.

The two storey extension would not consist of any new side window that could overlook and the windows to the front and rear would not provide any views into neighbouring windows or gardens, beyond that of the existing property. The proposal does include a terrace, located to the side of the two storey rear projection; however, this terrace would be screened by this two storey addition when viewed to the east. Overall, it is considered that there would be no unacceptable material overlooking in this respect and the application poses no material harm to resident amenity in the immediate area.

There would be no material overshadowing as a result of the extension and if any were to arise this would be when the sun is at its lowest, given the orientation of the site. Therefore, any impact it may cause would not be significant nor unacceptable in any case. In addition to this, the height of the extension is level at both the ridge and eaves height.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2023), and Policies 2 and 3 of the Local Plan.

Highway Safety and Parking

Section 9 of the National Planning Policy Framework (December 2023) specifically relates to 'Promoting sustainable transport'. Paragraph 115 of the National Planning Policy Framework (December 2023) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Further, policy 36, to be read in conjunction with Appendix 6 of the South East Lincolnshire Local Plan, sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

There would be an increase from four bedrooms to five bedrooms following the construction of the proposed extension, it is considered that the driveway to the front of the site would be capable of safely storing vehicles and provide adequate off street parking in this instance.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Local Plan Policies 2, 3 and 36, and Section 9 of the National Planning Policy Framework (December 2023).

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development inside the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the South East Lincolnshire Local Plan and the provisions of the National Planning policy Framework when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act

B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).

C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking the above considerations into account, the proposal is considered to somewhat conflict with Policies 2 and 3 of the South East Lincolnshire Local Plan however following the justification made in the character section of this report, the LPA are unable to resist the application and therefore recommend approval on this basis. The development is however in accordance with Policies 1 and 36 (including Appendix 6) of the South East Lincolnshire Local Plan (SELLP) (2019), along with the identified sections contained within the National Planning Policy Framework (NPPF) (December 2023). There are no significant factors in this case that indicate against the proposal and outweigh the consideration in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
