When such services have been inserted in the trenches, the trenches shall be carefully backfilled and consolidated by foot every 150 mm of depth. Under no circumstances shall a machine dig be allowed within the fenced areas.

Reason: To safeguard the trees during the development.

5 Prior to development being commenced all trees being retained on the site should be fenced off at least 1 metre beyond the spread of such trees by means of a fence of a minimum 1200 mm high, consisting of chestnut paling firmly secured top and bottom to line wires fixed to fence posts a maximum of 2 metres apart. Such fencing shall be properly maintained throughout the period of construction and removed only when the development is completed and building work ceases.

Reason: To safeguard the trees during development.

6 Before any development is commenced, a scheme of landscaping and tree planting for the site, including details of positions, heights on planting and species of trees and shrubs, shall be submitted to and approved in writing by the Local Planning Authority.

Reason: In the interests of visual amenity.

7 The approved scheme of landscaping and/or screening shall be carried out in its entirety within a period of two years beginning with the date on which development of the land is commenced. The trees, shrubs or bushes shall be adequately maintained by the owner(s) of the land on which they are situated for a period of ten years beginning with the date of completion of the scheme, and all losses shall be made good during that period.

Reason: In the interests of visual amenity and to ensure that the approved scheme is implemented satisfactorily.
