

Proposed Garage / Storage Building at

42 High Road, Moulton, Spalding,
Lincolnshire, PE12 6PE.

Biodiversity ASSESSMENT.

De Minimis Exemptions

In minor developments, the de minimis exemption prevents the BNG objective from being applicable if the plans of the non-major development are only likely to cause minimal harm to irreplaceable habitats. More specifically, the de minimis threshold applies if the developer impacts less than 25 square metres of the on-site habitat at a biodiversity value higher than zero unless it is considered a priority habitat such as modified grassland, and on less than five metres of on-site linear habitats such as hedgerows and watercourses.

This development is positioned within the existing paddock area of the site, No habitat is being harmed / altered or affected in any way by this development. The existing garden building indicated on the plan will be removed when this building is completed and this area will be returned to grass / garden area.

Dated 01/10/2024

Mr Jamie Clayton
