2nd September 2015

Dear Diane,

Following the Parish Council meeting last night I have been asked to contact you with regard to seeking permission to carry out work within the churchyard in Moulton. All councillors received a copy of CH1 and CH2 in order that they could see the extent of the work involved and concur that the following items are in need of attention.

1. No.10 Horse Chestnut to be removed as discussed.
2. No.14 Remove sycamore sucker.
3. No.16 Remove oak suckers.
4. No.32 Remove conifer in middle of grave & transplant.
5. No.48 Remove field maple sucker.
6. No.61 Remove ash & horse chestnut sucker.
7. No.76 Remove yew sucker.

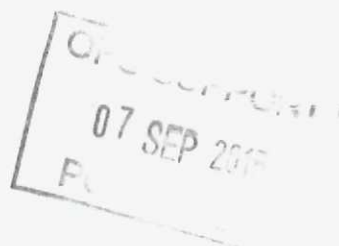

Depending on the costing's, further tidying up in line with the 'suggested work required' on CH1 will be carried out as and when the budget allows but at a sensible and sensitive time for nesting birds and tree growth during the calendar year.

I understand from our conversation that if granted, the application for tree works is valid for 2 years.

I look forward to hearing from you in due course however, if there is anything further you require, please do not hesitate to contact me.

Kind regards

Helen Worth
Clerk to the Council

CH1 - ALL SAINTS CHURCHYARD - MOULTON

Inspection by Parish Clerk & Diane Fairchild-Fenton (SHDC) on 19th August 2015

Trees coming under a TPO are 1.5m above ground & more than 75mm in circumference
