I have reviewed the EPS Limited letter dated 12th February 2020 'Supplementary Gas Motioning - Land adj 1 Hall Lane, Moulton Seas End' their ref UK19.4517c and am in agreement with the findings.

This letter should form part of the determined plans, and on that basis sufficient information has been presented such conditions relating to land contamination are not required.

As always, the developer is reminded that if unsuspected contamination is encountered, all works must cease until a scheme to resolve the contamination has been agreed.
