29 April 2022

Dear Dani,

Thank you for allowing us the opportunity to quote for Chapel Gate - Moulton Chapel.

Our aim at Proludic is to capture the imagination of every visitor to our play areas through inventive designs, creative ideas on inclusive play and stimulating products. We design our play areas to incorporate all these aspects whilst ensuring we achieve compliance with the relevant legislations.

We offer a full service including advice, design, contract management and a dedicated after sales service which is unmatched in this industry. We pride ourselves on our offering of complete solution from start to finish of your project.

We will contact you within two weeks to see how we can help further with your project. However, if you have any queries regarding this quote or any part of our service in the meantime, please do not hesitate to contact me on 07881 917 018.

Yours sincerely

Kiran Chouhan
Area Sales Manager

Ages: 2+

Users: 1

Play Values: 5

Play Elements: 1

Maximum fall height

Description

Springers are an essential element of play spaces for young children. They enhance a toddler's sense of balance and help them coordinate their movements, while giving older children great fun as they rock wildly.

Spring mounted equipment develops **motor skills**, **sense of balance** and **provides fun swinging movements**.

Inclusive Elements

The oscillating movement of the springer has a calming effect for autistic children and this unit encourages them to interact with other children.

The rocking motion has positive effects on the inner ear of children with hearing impairments.

Play Elements: 1

Maximum fall height

Description

Our Origin range has grown from the instinctive desire children have to play and interact with the natural environment. The range captures the essence of natural by combining natural elements with clean product lines, minimal design and essential play activities, the fundamental principles of our Origin range.

Working as a pair, children can rock themselves as energetically as they like, pushing their hands and feet as hard as they can in order to spring into action!

Description

Our Origin range has grown from the instinctive desire children have to play and interact with the natural environment. The range captures the essence of nature by combining natural elements with clean product lines, minimal design and essential play activities, the fundamental principles of our Origin range.

Rotating equipment provides good sensory and motor stimulation. This roundabout offers toddlers the opportunity to partake in group or individual spinning, they are able to stand, sit or kneel on this unit depending on how adventurous they feel. Children can experience speed safely. The handrails will help children hold themselves in position, in particular those with limited stability.

Inclusive Elements

The rotation movement has positive effects on the inner ear of children with hearing impairments.

*Largest
Pod Swing
in the
industry!*

Ages: 2+

Users: 6

Play Values: 6

Play Elements: 1

Maximum fall height

Description

The Pod Swing encourages group play and social interaction. Children can work together to swing as high as possible, make new friends and see how many of them can fit in the pod at once.

Swings combine **motor coordination** and **sensory stimulation** and develop **the sensation of feeling the body move in space**.

Our Pod Swing is **1.24m wide making it the largest in the play industry** allowing a parent or carer to swing alongside a child.

Inclusive Elements

Swinging has a calming influence on children with learning difficulties.

The activity of swinging is beneficial for children with hearing impairments due to the positive effect it has on the inner ear.

Retention in position is essential to reassure children with visual impairments and prevent any risk of being thrown out of the equipment. The seats are therefore a wraparound pod tyre design to ensure the back is in the correct position providing the body stability during play.

The large pod allows either a seated or lying position and offers a large supportive surface for children with less developed muscle tone. It also offers open space and height suitable for easy wheelchair transfer.

Maximum fall height

Inclusive

Description

Our Origin range has grown from the instinctive desire children have to play and interact with the natural environment. The range captures the essence of natural by combining natural elements with clean product lines, minimal design and essential play activities, the fundamental principles of our Origin range.

Climbing posts enable movement up, down and across. The coloured hand and footholds on the posts, at various heights and facing different ways, encourage off-ground body action and enable varying directions or zig zag type progress. More cautious children will stay on the lower supports whilst the more daring will target the top of the tallest post. This is an updated version of the conventional climbing wall, with added transparency.

Inclusive Elements

A child with autism may have difficulty with balance. However, if you provide a wide range of fun balancing activities within an activity trail with different heights, widths and motion it will allow autistic children to experiment.

Play Elements: 1

Maximum fall height

Description

Our Origin range has grown from the instinctive desire children have to play and interact with the natural environment. The range captures the essence of nature by combining natural elements with clean product lines, minimal design and essential play activities, the fundamental principles of our Origin range.

Three players can be on this unit at one time, giving children the opportunity to challenge each other to improve their coordination skills and upper body strengthening by traversing from one end to the other. Once the technique has been mastered then speed can be built up and competitive games created. This is ideal for users of all ages and can be used for both play and fitness activity.

Inclusive Elements

A child with autism may have difficulty with balance. However, if you provide a wide range of fun balancing activities within an activity trail with different heights, widths and motion it will allow autistic children to experiment.

Sliding

Ages: 2+

Users: 7

Play Values: 4

Play Elements: 1

Maximum fall height

Inclusive

Description

The slide is still a firm favourite with children. Whatever the size or shape sliding is great fun! Slides provide the sensation of speed without the child having to make any effort during the descent. Slides are a traditional choice for play areas and are always very popular.

Inclusive Elements

The sliding movement has a positive effect on the inner ear of children with hearing impairments.

Guarantees

25, 10, 5 and 2 years

Proludic is committed to the quality and durability of its products.

In addition to using carefully selected materials and applying the highest manufacturing standards, Proludic provides extensive guarantees.

Our guarantees:

25 years for any structural failure of sport or play products due to a material or manufacturing failure of:

- Panels (lacquered plywood / coloured compact / polyethylene)
- Posts and supporting structures (painted galvanised steel, galvanised steel, stainless steel)
- Stainless steel tubes

10 years for any structural failure of sport or play products due to a material or manufacturing failure of:

- Metal components (with the exception of springs, moving or mechanical parts and fixings)
- High density plastic parts (with the exception of moving or mechanical parts)
- Non-slip plywood and compact panels
- Posts (timber)
- Robinia wood planks

5 years for any structural failure of sport or play products due to a material or manufacturing failure of:

- Springs and mechanical systems
- Moulded or rotary moulded plastic parts (with the exception of moving parts)
- Metal crimps and rope assemblies

2 years for any defect or manufacturing fault of component parts.

A Practical and Proactive Approach to Safety

Every piece of Proludic play equipment has been manufactured to conform to the current European standards.

Proludic equipment has been inspected and certificated by an independent laboratory (TUV) to conform to the European standards EN 1176.

Proludic Sport abides by the European legislation in place and makes the DIN, NF, and EN standards an integral part of part of both its design and testing stages. Our design teams are involved in the development of these safety standards in order to ensure the safety of our users while offering them exciting opportunities.

The main certifications provided are issued by the German TUV safety and testing organisation.

Terms and Conditions

Formation of a Contract

The quotation given on or attached to these terms and conditions will remain valid for a period of 90 days, unless otherwise stated on the quote. Acknowledgment and acceptance of this proposal is made by you placing an order within the specified period above, at which time you will be bound by these terms and conditions. Each proposal accepted shall constitute an individual legally binding contract between you and us. Such contract is hereinafter referred to in these terms and conditions as "an order". Nothing in these terms and conditions shall prejudice any condition or warranty expressed or implied, or any legal remedy to which we may be entitled in relation to the goods / and or the work the subject of this order.

Our Responsibility

We will ensure that all materials supplied comply with safe building practices and are free from defects and that any work carried out is carried out with reasonable care and skill and to a reasonable standard. Before starting any work we will carry out an inspection to make sure that all work quoted is appropriate and practicable. If after our inspection any further work is necessary either because of alterations in design, specification or otherwise and this causes an increase in costs we will send you a further proposal giving details of the extra costs and will only proceed with the works once your written acceptance has been received. Subject to our terms we will carry out the work in accordance with our proposal. We will make good any damage caused whilst carrying out the work.

Your Responsibility

You will permit us during normal working hours to carry out an inspection and thereafter to undertake the works according to the programme set out in the proposal. You will remove all items necessary to allow us to commence the works and cover and protect all fixtures and fittings, which cannot be removed. You will obtain all permissions and consents, (including if necessary planning permission) from landlords, local authorities and others, which are required before the work can commence. Where you are required to provide us with measurements or other information such measurements or information must be correct. If we rely on the measurements or information given when preparing our proposal and such measurements or information are incorrect we reserve the right to increase the price to make good any errors or additional works required as a result.

Payment

Goods are invoiced upon dispatch. Payment terms are strictly net 30 days from the date of invoice. Acceptance of this order constitutes agreement of these terms and overrides any other payment terms, including any quoted on your purchase order. We reserve the right to issue interim invoices or applications for payment, or request payment prior delivery or installation on a proforma basis. Please note all prices quoted are excluding VAT.

Delivery/Installation Dates

UK delivery is priced at 10% (with a minimum £100 charge) based on the total list price value of the equipment. We reserve the right to increase the delivery charge dependent on location of delivery address, all amended prices will be notified on quotations. You will be provided with an estimated delivery date on receipt of order and updated throughout the order process. Delivery is approximately 4-6 weeks from the date of order. Deliveries that cannot be accepted by the customer within 4 weeks of the agreed date, will be subject to a storage charge of £100 per week or 1% of the equipment value, whichever is greater

Minimum Installation Charge

On orders received with installation, a minimum installation charge per site of £1000 applies in all cases.

Budget costs assume that easy lorry access & precise siting of the equipment will be provided, no surface or underground obstructions will be encountered during excavation such as concrete, hard-core, rock, chalk, roots, drainage, gas or water pipes, telephone or electricity cables etc. In the event of any such obstructions we reserve the right to charge for any additional work involved. We cannot accept liability for any consequent charges that may be incurred by disruption of any of the foregoing services. For fixed installation prices, a site survey is required by a company representative prior to the order being placed

Main Contractor's Discount

Our quotation does not include for a Main Contractor's Discount. If a 2.5% Main Contractor's Discount is applicable, please add 2.563% to our quoted prices.

Cancellation Policy

The Company reserves the right to levy a cancellation charge of:

- 25% of the total order value if cancelled more than 6 weeks from the scheduled delivery / start date.
- 50% of the total order value if cancelled less than 6 weeks from the scheduled delivery / start date.

Please Note: Any such charge is non-negotiable and is solely at the discretion of the Company. All drawings, descriptive and forwarding specifications, particulars of weights and dimensions are approximate only and not binding and illustrations contained in catalogues, price lists, sales literature and other advertisement material are for the purpose of general description only and none of these shall form part of this Contract.
