**Application for a Lawful Development Certificate for a Proposed use or development.
Installation of wind turbine (height to blade tip 74 metres) and ancillary work/
structures, plus temporary anemometry mast. Chapel Farm, Moulton Chapel**

Dear Mr. Gedney

Following your advice received by email on the 2nd November I've pleasure in submitting this Application for a Lawful Development Certificate with regards to the 74m wind turbine at Chapel Farm, Moulton Chapel which received planning permission and is subject to a schedule of conditions (Planning Reference H13-1558-07FULL).

This application requests formal notification on the implementation of the planning permission. Planning Condition 1 attached to the planning permission states:

'The development must be begun not later than the expiration of three years beginning with the date of this permission'

The planning permission is dated 16th May 2012. Therefore in order to comply with condition 1 the planning permission required implementation prior to the 16th May 2015.

Evidence confirming the implementation of the planning permission prior to the 16th May 2015 is given by the following:

- A series of date stamped photographs taken by REG Windpower's Construction Manager dated 11th and 12th May 2015 during the excavation works of the foundation
- A series of date stamped photographs taken by Askam Engineering's Site Manager dated 13th May 2015 during the excavation works of the foundation

I trust that this is sufficient to satisfy the Council that planning permission for the Chapel Farm Wind Turbine has been implemented. Please do not hesitate to contact me if you require further information.

Yours sincerely,

Simon Morgan
Development Manager
