are not worthy of retention (not protected), and should not be used to affect the development of the site in any way.

9.3 FIELD NOTES - LEGALLY PROTECTED TREES:

Tag 1852: Tree T1 of the Preservation Order. A middle-aged Deodar Cedar (*Cedrus deodara*), which is currently 13.5 metres tall, with a rather uneven crown spread of 11.0 metres, and a trunk diameter of 588mm. The main branches emanate from a height of 2.5 metres above ground level. Ivy is present from ground level to a height of 8.0 metres. The tree appears generally healthy, although a branch has been lost during the recent gale-force winds. British Standard 5837 category rating B1/C1.

Picture showing the branch that was lost from the Cedar (T1) in the recent gales.

Tag 1853: Tree T4 of the Preservation Order. A mature Silver Birch (*Betula pendula*), located at the southern side of the site. It is currently 15.5 metres tall, with an average crown spread of 7.0 metres, and a trunk diameter of 375mm. The main branches emanate from a height of 1.0 metre above ground level. The tree appears generally healthy,
