CASE OFFICER ASSESSMENT

PROPOSAL

This is a full planning application for change of use to a sui generis use for relocation of a haulage business to Rosecott Farm, Dozens Bank, West Pinchbeck. The existing farm buildings would remain on site and would be used for storage purposes. The dwelling to the north at Rosecott Farm would be used for office use and living purposes.

Lunns Haulage who are seeking to occupy the site are an existing business and have a licence for 5 lorries and 5 trailers. The proposed hours of operation are Monday to Sunday 05:00 to 20:00. The company do not operate refrigerated vehicles.

SITE DESCRIPTION

The site is 0.4 hectares in total. The site is outside of defined settlement limits in the open countryside, and the surrounding area is characterised by non-nucleated frontage development of varying ages and designs. Neighbouring property Wembley House is located to the north of the site and is 60 metres away at the nearest point. Southfields is the only other dwelling in the immediate vicinity and is located on the opposite side of Dozens Bank, 35 metres away at the nearest point. There are other dwellings in the area, with the next nearest being located 150 metres away at the nearest point.

RELEVANT PLANNING HISTORY]

None

REPRESENTATIONS

Public

3 objections received from local residents on the following summarised grounds:

Noise

Highway safety

Traffic

Potential loss of trees

Loss of privacy from high lorry cabs

Light pollution

Air pollution

Land Pollution

Proposed hours of operation

Loss of view over land outside of ownership (Carries minimal planning weight)

SHDC - Inward Investment Manager

Support

LCC - County Highways & SUDS Officer

No objections

SHDC - Environmental Protection

No objections

SHDC Trees and Nature Conservation Officer

An oak tree close to the entrance now has a Tree Preservation Order placed upon it. The Officer

requests a condition controlling pruning works to this tree.

CONSIDERATIONS

Principle of use

The proposal site is immediately adjacent to the A151 which is the main route west from Spalding. It is therefore well connected to many settlements. The spacious site allows for the manoeuvring of vehicles without cause for concern. 5 lorries and trailers can be stored on this site without harm to the amenity of site users of the surrounding area.

Policy 7 of the SELLP is titled - Improving SE Lincs Employment Land Portfolio. The section under Other Employment Sites states:

"New employment development/businesses or the extension of an existing business outside the above allocated employment sites will be supported provided that the proposal involves the re-use of previously-developed land or the conversion/re-use of redundant buildings. Where it can be demonstrated that no suitable building capable of conversion/re-use is available or the re-use of previously-developed land is not available or is unsuitable, proposals on non allocated sites may be acceptable provided:

- a. the development does not conflict with neighbouring land uses;
- b. there is no significant adverse impact upon the character and appearance of the area;
- c. the design is responsive to the local context;
- d. there will be no significant adverse impact on the local highway network;
- e. there will be no significant adverse impact upon the viability of delivering any allocated employment site;
- f. proposals maximising opportunities for modal shift away from the private car are demonstrated; and
- g. there is an identified need for the business location outside of identified employment areas on the Policies Map."

With regard to criterion a) the immediate neighbouring land uses are arable land to the east and south, with the dwelling in the applicant's ownership to the north. There is a dwelling to the east but this is set back from the nearby A151. There is not considered to be impact on neighbouring land uses.

There is not a significant impact on the character and appearance of the area. The site is quite well shielded by a dwelling to the north and a line of trees to the south. Parked vehicles will be recessed from the adjacent highway. The design is therefore considered responsive to the local context as it is well shielded and no buildings with the red line boundary are to be altered.

Regarding criterion d), there will be no material impact on the local highway due to the relatively small maximum amount of 5 lorries on site. There will be no impact on the viability of any allocated employment sites as there are none in the immediate vicinity and the site is well served by the A151 allowing drivers to access the site by car or other vehicles with ease. In summation, the proposal is considered to accord with all the relevant criteria save for criterion f).

Noise

The business does not operate any refrigerated vehicles and the parking area is located away from the immediate entrance of the site. The business in order to allow for flexibility requires working hours from 05:00 to 19:00 Monday to Sunday. However, in normal circumstances there is little operation at weekends. The business is next to the A151 which is a major thoroughfare so there is not consideration to be a material increase to background noise from normal base levels. Environmental Protection has no objections to the proposal.

Highway safety

There is not considered not be a material impact on highway safety as a result of the proposal. The speed limit on this road is 50mph with good visibility north and south from the entrance.

Traffic

There is not considered to be a material increase in traffic as a result of this proposal. The site is only to be used for five vehicles, with the adjacent A151 being a major thoroughfare from the west into Spalding.

Potential loss of trees

No trees are to be removed and a preservation order has been made on an oak tree adjacent to the A151 to the southern side of the vehicular entrance.

Loss of privacy from high lorry cabs

This is not considered to be a material planning concern. Haulage lorries are a considerable distance from neighbouring properties and the driver will be preoccupied with driving whilst the vehicle is in motion.

Light pollution

There is not considered to be material light pollution arising from this proposal. No additional lighting is proposed on site and any light pollution from the vehicles in operation will be temporary as they manoeuvre to and from the site.

Air pollution

There is not considered to be a material increase in air pollution arising from the proposal. The vehicles will set off and will be undertaking haulage duties in the day, then will be parked up over night.

Land Pollution

There is not considered to be a material increase in land pollution arising from the proposal.

Proposed hours of operation

The hours of operation are considered to be appropriate for the nature of the business and the rural context of the surrounding area.

Conclusion

It is considered for the reasons set out above that the proposed development would accord with local and national planning policies and the impact on the amenity of the local area may be appropriately controlled by the imposition of conditions.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act

B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).

C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be

balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

RECOMMENDATION

Recommendation is for delegated approval.

This application was referred to Chairman's Panel on 12th June 2020, where it was agreed the decision could be delegated to officers.
