CASE OFFICER ASSESSMENT

Proposal

This is a full planning application that seeks permission for the conversion of an existing recording studio and adjoining barns to a single storey dwelling.

Site Description

The application site is located on the southern side of Starlode Drove in West Pinchbeck. The existing buildings comprise of a grouping of single storey former barns alongside Longrow Farmhouse to the west, with open fields to the north, east and south.

The buildings are constructed predominantly in red common brickwork under a slate roof, with some areas having been reroofed in profiled metal sheet.

History

H14-0880-97 - Full - Convert existing outhouses to recording and music studio - Approved 30.10.1997

Consultation Responses

The responses received from consultees during the initial consultation exercises, which can be viewed in their entirety through the South Holland website, can be summarised as follows:

SHDC Environmental Protection - Noise

No observations

SHDC Environmental Protection Officer - Contaminated Land

I request a precautionary land contamination applied at this location as follows:

In the event that contamination is found at any time when carrying out the approved development that was not previously identified it must be reported immediately to the Local Planning Authority (LPA). An investigation and risk assessment must be undertaken in accordance with details to be agreed with the LPA. Where remediation is necessary, a remediation scheme must be submitted to and approved in writing by the LPA. Following completion of measures identified in the approved remediation scheme a verification report shall be submitted to and approved by the LPA.

No deviation shall be made from this scheme without the express written agreement of the LPA. If during redevelopment contamination not previously considered is identified, then the LPA shall be notified immediately and no further work shall be carried out until a method statement detailing a scheme for dealing with the suspected contamination has been submitted to and agreed in writing by the LPA.

Reason: To assess whether the site is polluted and to address any pollution to ensure a satisfactory development. This issue is integral to the development and therefore full details need to be finalised prior to the commencement of works.

This Condition is imposed in accordance with Policy 30 of the South East Lincolnshire Local Plan, 2019

Lincolnshire Bat Group

Thank you for referring this application and ecological report to Lincolnshire Bat Group. Although no evidence of bat use was found the site's proximity to the South Forty Drain, a major feeding area for, in particular, pipistrelle bats means that we would endorse the recommendations re bat boxes and lighting - see sections 7.1 and 7.2.

LCC Highway and Lead Local Flood Authority

Recommendation: No Objections

The proposal is for the conversion of a recording studio & barns to form 3 bedroom dwelling. The existing access is retained for Longrow Farmhouse with additional parking. The new Access is to be constructed to Lincolnshire County Council specification and a note has been included on the proposed site plan. There is adequate parking for the proposed dwelling and the proposal will not have an adverse impact on the public highway.

As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to drainage and surface water flood risk on all Major applications. This application is classified as a Minor Application and it is therefore the duty of the Local Planning Authority to consider the surface water flood risk and drainage proposals for this planning application.

Public Representation

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, no letters of representation have been received.

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework (updated 2023) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Furthermore, where a Neighbourhood Plan has been adopted, this alongside the adopted Local Plan, forms part of the Development Plan for the District, and must be considered when assessing development proposals. In this instance, no relevant neighbourhood plans have been adopted.

The Authority is also able to demonstrate a supply of deliverable sites equivalent to in excess of 5 years through the latest Housing Land Supply Assessment.

Principle of Development and Sustainability

The South East Lincolnshire Local Plan sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order.

The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy in respect of sustainable development are areas of limited development opportunity including Minor Service Centres, with

areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location.

The site is located outside of any settlement boundary as set out in the South East Lincolnshire Local Plan (2019) (SELLP) and is, therefore, classed as being in the countryside in planning policy terms. Policy 1 of the Local Plan (Spatial Strategy) states that development in the countryside will only be permitted that is necessary to such a location and/or where it can be demonstrated that it meets the sustainable development needs of the area in terms of economic, community or environmental benefits.

Notwithstanding the above, Policy 23 of South East Lincolnshire Local Plan (SELLP) 2019 relates to The Reuse of Buildings in the Countryside for Residential Use. This policy states that "proposals for the conversion of existing buildings which are located outside defined settlement boundaries to residential use will be permitted provided that:

1. the building is structurally sound and capable of conversion without the need for significant extension, alteration or rebuilding;
2. the building is of architectural or historic merit or makes a positive contribution to the character of the landscape, to justify conversion to ensure retention;
3. the proposal is in keeping with its surroundings;
4. the design is sympathetic to the character and appearance of the building in terms of architectural detailing and materials of construction; and
5. development leads to an enhancement of the immediate setting of the building".

The majority of the outbuildings being already converted into a recording studio, implies that the building is considered structurally sound and capable of conversion without the need for significant extension, alteration or rebuilding, therefore, complying with point 1 of Policy 23. With regards to the storage barns that are also to be converted a structural survey has been submitted confirming the additional buildings are also structurally sound and capable of conversion without the need for significant extension, alteration or rebuilding, there is no reason to suggest why this report is not accurate.

The proposed conversion is designed in a sympathetic manner with the original fabric of the buildings and character of the area. One of the most positive parts of the design is that all the original openings are being retained, maintaining the character of the building. The use of more contemporary materials within the modest extension to the front is carefully considered so as not be at odds with the rural character of the site and its setting and appears in a sympathetic manner with the original fabric of the buildings and character of the area.

The proposal is sympathetic to the character of the original barns and their adaptation over time. The proposal retains a sense of functional design. The conversion will maintain material and construction detail indicative of past uses wherever practicable. The conversion will enable physical and visual improvement of the existing fabric. Where new or replacement materials, such as the timber boarding and cladding are used, the finish and detailing will be sympathetic to the setting and chosen to compliment the original fabric and form. Therefore, complying with points 2, 3, 4 and 5 of Policy 23.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2023) specifically relates to 'Achieving well-designed places' and details that "The creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2023), states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development

should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing. Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework, in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

As stated above the proposed conversion is designed in a sympathetic manner with the original fabric of the buildings and character of the area. One of the most positive parts of the design is that all the original openings are being retained, maintaining the character of the building. The use of more contemporary materials within the modest extension to the front is carefully considered so as not to be at odds with the rural character of the site and its setting and appears in a sympathetic manner with the original fabric of the buildings and character of the area.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with policies 2 and 3 of the South East Lincolnshire Local Plan and Section 12 of the National Planning Policy Framework (December 2023).

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2023) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

There are no neighbouring properties to the north, east and south. It is not considered that the proposed development will have a material adverse impact on residential amenity in terms of being overbearing or creating an overlooking or loss of light impact. The location of the barn is approximately 12m from the closest elevation of the neighbouring dwelling No.167. The proposed development is considered to form an appropriate design as to minimise the potential for overlooking to the existing neighbouring dwelling.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework, and Policies 2 and 3 of the Local Plan.

Highway Safety and Parking

Section 9 of the National Planning Policy Framework (December 2023) specifically relates to 'Promoting sustainable transport'. Paragraph 115 of the National Planning Policy Framework (December 2023) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Further, policy 36, to be read in conjunction with Appendix 6 of the South East Lincolnshire Local Plan, sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

The proposal is for the conversion of a recording studio and barns to form 3 bedroom dwelling. The existing access is retained for Longrow Farmhouse with additional parking. The new Access is to be constructed to Lincolnshire County Council specification and a note has been included on the proposed site plan. There is adequate parking for the proposed dwelling and the proposal will not have an adverse impact on the public highway. LCC highways have been consulted and have raised no objections.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Local Plan Policies 2, 3 and 36, and Section 9 of the National Planning Policy Framework.

Flooding Considerations

Section 14 of the NPPF requires development plans to "apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: a) applying the sequential test and then, if necessary, the exception test as set out below".

Paragraph 168 details "The aim of the sequential test is to steer new development to areas with the lowest risk of flooding from any source. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding", with the sequential approach being required in areas known to be at risk now or in the future from any form of flooding, with the flood risk assessment being the tool to demonstrate this.

If, following the application of the Sequential Test, it is not possible, consistent with wider sustainability objectives, for the development to be located in zones with a lower probability of flooding, the Exceptions Test can be applied if appropriate.

The site lies within Flood Zones 1 and 2 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the South East Lincolnshire Strategic Flood Risk Assessment (2017) as a basis to apply the sequential test.

The submitted flood risk assessment demonstrates that probability of flooding from localised drainage systems is low. The probability of the site flooding from any Environment agency system is less than 1% annual probability (1 in 100 chance each year) because of the existing flood defences. During the design life of the development it is not anticipated that the site would flood. The SFRA considers the residual risk associated with overtopping and a breach in the defences in 2116. The map shows that the peak flood depth at the site is between 0.25m and 0.5m.

The submitted flood risk assessment advises that there would not be an unacceptable risk of flooding provided the finished floor levels of the dwellings are set 550mm above existing ground levels and there 300mm of flood resistant/resilient construction above the finished floor levels. These mitigation measures will be subject to a condition.

Overall, when considering the development on balance, it is considered that given the mitigation measures detailed and recommended by condition, it is considered that the proposal accords with Policies 2, 3 and 4 of the South East Lincolnshire Local Plan and the intentions of the National Planning policy Framework in this regard.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development outside the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the South East Lincolnshire Local Plan and the provisions of the National Planning policy Framework when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Conclusion

Taking into consideration these factors, the proposal is considered to comply with Policies 2, 3, 4, 23 and 36, along with Appendix 6, of the South East Lincolnshire Local Plan (SELLP), 2019; in addition to the identified sections contained within the National Planning Policy Framework (NPPF) (2023). Notwithstanding the aforementioned minor conflicts, there are no significant factors in this case that would outweigh the benefits of the proposal; therefore, in considering all the matters raised above the planning balance is in favour of the proposal and the policies referred to above.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act

B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).

C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
