DECISION DELEGATED TO HEAD OF PLANNING

Application No:	**H14-0176-24**	**Applicant:**	**South Holland District Council**
Proposal:	Proposed concrete hardstanding for vehicle parking including new vehicular access		
Location:	82 Surfleet Road Pinchbeck Spalding		
Terminal Date:	10th May 2024		

Planning Policies

South East Lincolnshire Local Plan - Adopted: March 2019

01	Spatial Strategy
02	Development Management
03	Design of New Development
04	Approach to Flood Risk
33	Delivering a More Sustainable Transport Network
36	Vehicle and Cycle Parking
APPENDIX 6	Parking Standards

CASE OFFICER ASSESSMENT

Description of Proposal

The proposal seeks full planning permission for the creation of an area of hardstanding to the front of 82 Surfleet Road. The hardstanding would measure 3600mm (width) by 4800mm (length). It would be constructed of a geotextile base, with a concrete top with a depth of 200mm.

Site Description

The site is within the settlement boundary of Pinchbeck, as outlined within the South East Lincolnshire Local Plan, 2019. The site is located towards the north of the settlement, opposite Birchgrove Garden Centre.

The site is within a primarily residential area; however, commercial properties exist to the east. Number 82 Surfleet Road is a semi-detached, brown brick bungalow. A large, grassed front garden is present currently. Number 82 is one of two pairs of this style of dwelling.

Relevant History

No relevant history.

Consultation Responses

The responses received from consultees during the initial consultation exercises, which can be viewed in their entirety through the South Holland website, can be summarised as follows:

Environment Agency

"The proposal can be classified as 'minor development' in relation to flood risk and does not appear to fit any other criteria on our consultation checklist, 'When to consult the Environment Agency'. It was therefore not necessary to consult us."

Welland and Deepings Internal Drainage Board

"The submitted Flood Risk Assessment prepared by South Holland District Council states the possibility of using the existing highway surface water drainage system for disposal of additional surface water run-off. Lincolnshire County Council Highway Department should be consulted as early as possible regarding surface water management as their permission may be required for this."

Pinchbeck Parish Council

"In August 2022 Pinchbeck was affected by significant rainfall over the course of one night, after a prolonged spell of hot, dry weather. The Met Office suggested these events would become the norm, and Lincolnshire County Council has also accepted these events will become more common place, and we should be prepared. Although a minor development, the Parish Council believe there is a negative, cumulative effect of using non-permeable surfaces for areas of hard standing. As a local authority, South Holland District Council should lead the way by ensuring permeable surface materials are used in preference to concrete, which simply accelerates run-off. The Parish Council does not object to the proposal, but suggest smarter materials could be deployed"

Highway and Lead Local Flood Authority

Initial Comments - received 25/03/24

Requests that the proposal is updated to confirm that access will be constructed to Lincolnshire County Council Specification - supplementary information has since confirmed this point

Public Representations

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, one letter of representation has been received.

This can be summarised as:

- Road is dangerous and so a turning point should be provided on site.

Key Planning Considerations

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019 (SELLP), is the development plan for the district, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework, December 2023 (NPPF) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Principle of Development

Policy 1 of the SELLP sets out the settlement hierarchy in respect of delivering sustainable development, which meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local need, whilst making more sustainable use of land, and to minimise the loss of high-quality agricultural plots by developing in sustainable locations and at appropriate densities.

Policy 1 expresses this sustainable hierarchy of settlements, ranking the settlements deemed to be most sustainable in descending order. The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy are areas of limited development opportunity including Minor Service Centres, with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location.

The site is within the settlement of Pinchbeck which is classed as a main service centre within Policy 1. Development will be permitted that supports Pinchbeck's role as a service centre, helps sustain existing facilities or helps meet the service needs of other local communities.

In any event, the proposal comprises development within the residential curtilage of 82 Surfleet Road, with the proposal comprising a hardstanding within the garden of an established residential property. Development within this location is considered appropriate and therefore, the proposal is considered to be in accordance with the SELLP when considered in principle, subject to other material considerations being met.

Layout, Design, Scale and Consideration of the Character of the Area

Section 12 of the NPPF, "Achieving well-designed and beautiful places", states that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the NPPF, states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality, to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing. Developments create places that are safe, inclusive, and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the SELLP outlines sustainable development considerations for proposals; providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 of the SELLP requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the NPPF and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable. Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design, and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The addition of hardstanding here would not appear out of character. Hardstanding is currently prevalent in the area, with it present on both neighbouring dwellings. The scale of the proposal is minor and proportionate to the plot size.

The scale of the proposal, measuring 3600mm (width) by 4800mm (length), is comparable to the aforementioned existing areas of hardstanding. The plot is of sufficient size to accommodate the concreted area, while still maintaining a level of greenery and a sufficient and useable amenity space.

Taking account of the design, scale, and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the SELLP and Section 12 of the NPPF.

Impacts Upon Residential Amenity

Paragraph 135 of the NPPF states that development should create places that are safe, inclusive, and accessible and which promote health and well-being, with a high standard of amenity for existing and future users.

Policies 2 and 3 of the SELLP sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

The proposed addition of hardstanding would have no impact upon neighbouring amenity in the long term. Naturally, there would be no overlooking or overshadowing as a result of the development and after the initial construction, which itself would take place over a short period, no additional noise pollution would be created as a result of the development.

As detailed above, the scale and design of the proposal is considered to have no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with Section 12 of the NPPF and Policies 2 and 3 of the Local Plan in terms of impact upon residential amenity.

Highway Safety and Parking

Section 9 of the NPPF is titled 'Promoting sustainable transport'. Within this, Paragraph 115 advises that "development should only be prevented or refused on highways grounds if there would be an

unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal. Policy 33 further reinforces the need for developments to be accessible via sustainable modes of transport.

Policy 36 of the SELLP, in conjunction with Appendix 6, sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

The proposal will create an additional parking space, further reducing the need for on-street parking at the site and in turn having the possibility of improving the flow of traffic on the street.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Policies 2, 3, 33 and 36 of the SELLP, as well as Section 9 of the NPPF.

Flooding Considerations

Section 14 of the NPPF requires development plans to "apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: applying the sequential test and then, if necessary, the exception test as set out below".

Paragraph 168 of the NPPF states " aim of the sequential test is to steer new development to areas with the lowest risk of flooding from any source. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding". The sequential approach is required in areas known to be at risk now or in the future from any form of flooding, with the flood risk assessment being the tool to demonstrate this.

If, following the application of the Sequential Test, it is not possible, consistent with wider sustainability objectives, for the development to be located in zones with a lower probability of flooding, the Exceptions Test can be applied if appropriate.

The site lies within Flood Zone 3 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the SELLP is clear in that "Development proposed within an area at risk of flooding (Flood Zone 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the SFRA as a basis to apply the sequential test.

Within the SFRA the site is classed as danger for most, with a hazard depth of up to 1 metre.

Despite the relatively high flood risk associated with the site, the additional hardstanding would not have a significant impact upon site drainage or flood risk. Ample grassed space would be maintained to enable any minor increase surface water to drain without impacting upon neighbouring residences. While the comments of the Parish Council have been noted in this respect, in this instance it is considered that the works are suitably minor in scale as to not

necessitate permeable materials.

Overall, when considering the development on balance, it is considered, given the mitigation measures detailed and recommended by condition, that the proposal accords with Policies 2, 3 and 4 of the SELLP and the intentions of the NPPF with regards to flood risk.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development within the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the SELLP and the provisions of the NPPF when viewed as a whole.

Conclusion

Taking these factors into consideration, the proposal is considered to comply with Policies 1, 2, 3, 4, 33 and 36 of the SELLP, as well as Sections 9, 12 and 14 of the NPPF. There are no significant factors in this case that would outweigh the benefits of the proposal; therefore, the planning balance is in favour of the proposal.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based

on the considerations set out in this report.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
