

Boundary Features

Condition 5 of H14-0328-21

Weldmesh fencing

Much of the site benefits from established hedges or will have new hedges planted. To ensure both security and light penetration to the hedge, this style of fencing will be used on all rear boundaries where there is a hedge. As the hedge grows the weldmesh can be removed according to the householder's choice. This is because as a natural boundary will have been achieved.

The gauge will be 50x50x2.5mm

Garden boundaries

Unless marked by a hedge to the rear of the garden (In which case weldmesh will be used as above), the common side boundaries to rear gardens will have timber close board fencing with concrete posts to a height of 1.8m.

Other boundary features – to follow

The front of the development to Milestone Lane will have ironwork and brickwork entrance features. These have yet to be designed in detail so will follow.
