Twin Wire Welded Mesh Fencing System

Strong and unobtrusive mesh fencing system with high resistance to vandalism

Effective perimeter fence for both public and private section buildings

Rigid double wire panels secured to posts with security fixings

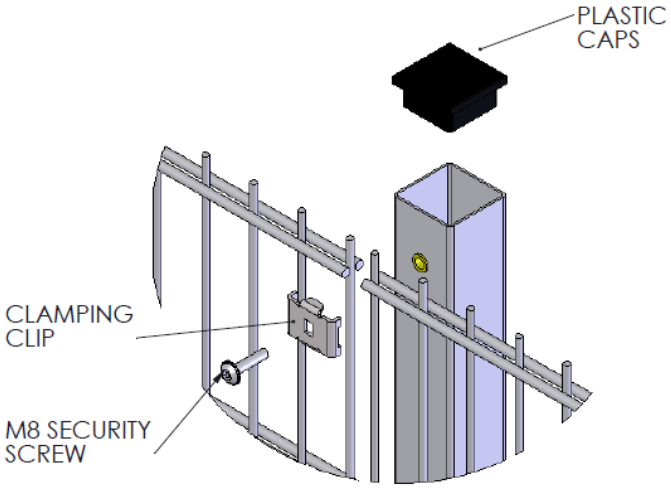

Polyester powder coated to a choice of colours

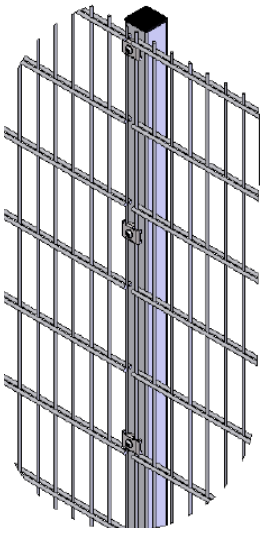

SPECIFICATION

The inherent strength within the panels is gained by sandwiching a 6mm (nom.) vertical wire between two 8mm (nom.) horizontal wires. This ensures that the heavy duty panels offer an extremely high resistance to vandalism. The panels are fixed via clips to threaded inserts in hollow section posts.

Standard Heights	1830, 2030 and 2430mm
Posts	60x60mm RHS set at 2.52 metre nominal centres
Wire	2no Horizontals 8mm diameter set at 200mm maximum centres 1no Vertical 6mm diameter set at 50mm maximum centres
Fixings	Security Clip Fixings: 5no per post for 1830 & 2030mm high 6no per post for 2430mm
Finish	Galvanised wire and polyester powder coated

Gates

There are a range of swing gates, cantilever and tracked sliding gates available to match the mesh system.

Choice of Finishes

The mesh system can be colour coated in a wide choice of colours.
