WRITTEN SCHEME OF INVESTIGATION FOR ARCHAEOLOGICAL MONITORING AND RECORDING ON LAND AT 160 SIX HOUSE BANK WEST PINCHBECK INCOLNSHIRE

Planning Application No: H14-0806-17
Grid Ref: TF 19890 24962
Accession No: Applied for

PREPARED FOR
Ms G RENSHAW

AUGUST 2020

APS provides a comprehensive range of archaeological services

- *Advice*
- *Heritage Statements*
- *Environmental Impact Assessments*
- *Desk-based Assessments*
- *Geophysical Survey*
- *LIDAR*
- *Building Recording*
- *Evaluation*
- *Monitoring and Recording*
- *Mitigation Strategies*
- *Excavation*
- *Finds analysis*

1 SUMMARY

1.1 *A programme of archaeological monitoring and recording is required during development groundwork on land at 160 Six House Bank, West Pinchbeck, Lincolnshire.*

1.2 *The site is archaeologically sensitive, located in an area of frequent cropmarks and finds indicating settlement from the Romano-British period and settlement sites of the early to Middle-Saxon periods.*

1.3 *The investigation will involve monitoring of development groundwork. Deposits exposed will be recorded in writing, graphically and photographically.*

1.4 *On completion of the fieldwork a report will be prepared detailing the results of the investigation. The report will consist of a narrative supported by illustrations and photographs.*

2 INTRODUCTION

2.1 This document comprises a specification for archaeological monitoring and recording of development on land at 160 Six House Bank, West Pinchbeck, Lincolnshire.

2.2 This document contains the following parts:

2.2.1 Overview.

2.2.2 Stages of work and methodologies.

2.2.3 List of specialists.

2.2.4 Programme of works and staffing structure of the project

3 SITE LOCATION

3.1 West Pinchbeck (also known as Pinchbeck West), in the parish of Pinchbeck is located approximately 5km northwest of the centre of Spalding and 11km northeast of Bourne in the South Holland district of Lincolnshire.

The site is located on the west side of Six House bank some 130m northwest of St Bartholomew's Church at National Grid Reference TF 19890 24962.

4 PLANNING BACKGROUND

4.1 A planning application (H14-0806-17) has been submitted and approved for the construction of a single dwelling and new vehicular access to 160 Six House Bank, West Pinchbeck, Lincolnshire. Permission is subject to a condition requiring the implementation of an archaeological programme of works fully detailed in a Written Scheme of Investigation, during groundworks associated with the development.

5 SOILS AND TOPOGRAPHY

5.1 The site lies at a height of *c*. 4m AOD on generally level ground. Local soils are of the Wallase 2 association typically pelo-calcareous alluvial gley soils (Hodge *et al* 1984, 338). These overlie a drift geology of tidal flat deposits which in turn seals a solid geology of Jurassic Oxford Clay (BGS 1992).

6 ARCHAEOLOGICAL OVERVIEW

6.1 Romano-British artefacts have been recovered by Leaves Lake Drove to the north of the site. These were indicated by soilmarks and a scatter of pottery and bone (LHER 20189).

6.2 An Early-Saxon settlement was found at Leaves Lake Drove to the west of the site (LHER 20191). Excavations were carried out in 1994. Intercutting shallow ditches and gullies were exposed. Interpretation of the function of these ditches was difficult given the relatively small area opened. Nevertheless, it is possible to suggest that two parallel ditches some 7m apart may have delineated a drove taking livestock down to a 15 to 20m diameter shallow pond. Within the pond one deposit in particular was artefact rich, with a domestic type assemblage represented. One possible structure was identified. It formed a shallow semi-circular gully into which two posts appeared to have been set. The structure was nearly ploughed out. Also of interest was a gully into which a complete bovine skull had been placed. Many of the other features also contained ceramic and bone finds. Pottery and animal bone indicate settlement in close proximity but not within the excavated area.

6.3 A Middle-Saxon settlement was identified to the northeast of the early site (LHER 20190). The site lay on a mound and was identified from scatters of pottery found in the area. Further activity of this date was found to the southwest of the site (LHER 20169) with finds including pottery, and iron slag.

6.4 Undated enclosures and linear features have been seen as cropmarks from aerial photographs immediately to the east of the proposed development site (LHER 20184). To the west is a similarly undated double ditched linear feature, probably a drove road (LHER 20188).

7 AIMS AND OBJECTIVES

7.1 The aim of the work will be to record and interpret the deposits and any archaeological features exposed during the development groundwork.

7.2 The objectives of the investigation will be to:

- Determine the form and function of the archaeological features encountered;
- Determine the spatial arrangement of the archaeological features encountered;

- As far as practicable, recover dating evidence from the archaeological features, and

- Establish the sequence of the archaeological remains present on the site.

8 SITE OPERATIONS

8.1 General considerations

8.1.1 All work will be undertaken following statutory Health and Safety requirements in operation at the time of the investigation.

8.1.2 All work will be carried out in accordance with the *Lincolnshire Archaeological Handbook* (Lincolnshire County Council 2016) and any revisions of such received up to the acceptance of this specification. Additionally, the work will be undertaken in consideration of, and with reference to, the regional research agenda (Knight *et al.* 2012).

8.1.3 The work will be undertaken according to the relevant codes of practise issued by the Chartered Institute for Archaeologists (CIfA), under the management of a Member of the institute (MCIfA). Archaeological Project Services is CIfA registered organisation no. 21.

8.1.4 Any and all artefacts found during the investigation and thought to be 'treasure', as defined by the Treasure Act 1996, will be removed from site to a secure store and promptly reported to the appropriate coroner's office and the Portable Antiquities'/Finds Liaison Officer. The archaeological curator will also be informed.

8.2 Methodology

8.2.1 The archaeological monitoring will be undertaken during the groundworks phase of development, and includes the archaeological monitoring of all phases of soil movement.

8.2.2 Stripped areas and trench sections will be observed to identify and record archaeological features that are exposed and to record changes in the geological conditions. The section drawings of the trenches will be recorded at a scale of 1:10. Should features be recorded in plan these will be drawn at a scale of 1:20. Written descriptions detailing the nature of the deposits, features and fills encountered will be compiled on Archaeological Project Services pro-forma record sheets.

8.2.3 Finds recovered will be bagged and labelled for later analysis.

8.2.4 Throughout the investigation a photographic record will be compiled. The photographic record will consist of:

- the site during the investigation to show specific stages of work, and

the layout of the archaeology within the area.

- individual features and, where appropriate, their sections.
- groups of features where their relationship is important.

8.2.5 Should human remains be located they will be left *in situ* and only excavated if absolutely necessary. Should removal be required the appropriate Ministry of Justice licence will be obtained before the exhumation of the remains. In addition, the Local Environmental Health Department, coroner and the police will be informed, where appropriate.

9 POST-EXCAVATION

9.1 Stage 1

9.1.1 On completion of site operations, the records and schedules produced during the investigation will be checked and ordered to ensure that they form a uniform sequence forming a level II archive. A stratigraphic matrix of the archaeological deposits and features present on the site will be prepared. All photographic material will be catalogued and labelled, the labelling referring to schedules identifying the subject/s photographed.

9.1.2 All finds recovered during the fieldwork will be washed, marked and packaged according to the deposit from which they were recovered. Any finds requiring specialist treatment and conservation will be sent to York Archaeological Trust.

9.2 Stage 2

9.2.1 Detailed examination of the stratigraphic matrix to enable the determination of the various phases of activity on the site.

9.2.2 Finds will be sent to specialists for identification and dating.

9.3 Stage 3

9.3.1 On completion of stage 2, a report detailing the findings of the investigation will be prepared.

9.3.2 This will consist of:

- A non-technical summary of the results of the investigation.
- A description of the archaeological setting of the investigation.
- Description of the topography of the site.

- Description of the methodologies used during the investigation.
- A text describing the findings of the investigation.
- A consideration of the local, regional and national context of the investigation findings.
- Plans of the archaeological features exposed. If a sequence of archaeological deposits is encountered, separate plans for each phase will be produced.
- Sections of the trenches and archaeological features.
- Interpretation of the archaeological features exposed, and their chronology and setting within the surrounding landscape.
- Specialist reports on the finds from the site.
- Appropriate photographs of the site and specific archaeological features.

10 REPORT DEPOSITION

10.1 Copies of the report will be sent to: the client and to Lincolnshire County Council Historic Environment Record.

11 ARCHIVE

11.1 The documentation and records generated during the investigation will be sorted and ordered into format acceptable to The Collection, Lincoln. This will be undertaken following the requirements of the document titled *Conditions for the Acceptance of Project Archives* for long-term storage and curation. The archive will be deposited by June 2021.

12 PUBLICATION

12.1 Details of the investigation will be input to the Online Access to the Index of Archaeological Investigations (OASIS).

12.2 If appropriate, notes on the findings will be submitted to the appropriate national journals: *Britannia* for discoveries of Roman date, and *Medieval Archaeology* for findings of medieval or later date. In addition, a note will be submitted to the local journal, *Lincolnshire History and Archaeology*.

13 CURATORIAL RESPONSIBILITY

13.1 Curatorial responsibility for the archaeological work undertaken on the site lies with the Planning Archaeologist, Lincolnshire County Council. They will be given written notice of the commencement of the project.

14 VARIATIONS AND CONTINGENCIES

14.1 Variations to the proposed scheme of works will only be made following written confirmation of acceptance from the archaeological curator.

14.2 In the event of the discovery of any unexpected remains of archaeological importance, or of any changed circumstances, it is the responsibility of the archaeological contractor to inform the archaeological curator.

14.3 Where important archaeological remains are discovered and deemed to merit further investigation additional resources may be required to provide an appropriate level of investigation, recording and analysis.

14.4 Any contingency requirement for additional fieldwork or post-excavation analysis outside the scope of the proposed scheme of works will only be activated following full consultation with the archaeological curator and the client.

15 PROGRAMME OF WORKS AND STAFFING LEVELS

15.1 The investigation will be integrated with the programme of construction and is dependent on the developers' work programme, and also on the quantity and complexity of archaeological remains encountered. It is therefore not possible to specify the person-hours for the archaeological site. Post-excavation work is likewise dependent on the quantity and complexity of archaeological remains encountered.

15.2 An archaeological supervisor with experience of investigations of this type will undertake the work.

15.3 Post-excavation analysis and report production will be undertaken by the archaeological supervisor, or a post-excavation analyst as appropriate, with assistance from a finds supervisor, illustrator and external specialists.

16 SPECIALISTS TO BE USED DURING THE PROJECT

16.1 The following organisations/persons will, in principle and if necessary, be used as subcontractors to provide the relevant specialist work and reports in respect of any objects or material recovered during the investigation that require their expert knowledge and input. Engagement of any particular specialist subcontractor is also dependent on their availability and ability to meet programming requirements.

Task	Body to be undertaking the work
Conservation	York Archaeological Trust
Pottery Analysis	Roman – I Rowlandson, independent specialist Post-Roman -A Irving, independent specialist

Non-pottery Artefacts	D. Buckley, APS. J Cowgill, Independent Specialists
Metallurgical Analysis	A. Frasca
Animal Bones	P Cope-Faulkner, APS
Environmental Analysis	J Rackham, Independent Specialist
Human Remains Analysis	Dr R Kendall, Independent Specialist

17 INSURANCES

17.1 Archaeological Project Services, as part of the Heritage Trust of Lincolnshire, maintains Employers Liability Insurance of £10,000,000, together with Public and Products Liability insurances, each with indemnity of £5,000,000. Copies of insurance documentation can be supplied on request.

18 COPYRIGHT

18.1 Archaeological Project Services shall retain full copyright of any commissioned reports under the Copyright, Designs and Patents Act 1988 with all rights reserved; excepting that it hereby provides an exclusive licence to the client for the use of such documents by the client in all matters directly relating to the project as described in the Project Specification.

18.2 Licence will also be given to the archaeological curators to use the documentary archive for educational, public and research purposes.

18.3 In the case of non-satisfactory settlement of account then copyright will remain fully and exclusively with Archaeological Project Services. In these circumstances it will be an infringement under the Copyright, Designs and Patents Act 1988 for the client to pass any report, partial report, or copy of same, to any third party. Reports submitted in good faith by Archaeological Project Services to any Planning Authority or archaeological curator will be removed from said planning Authority and/or archaeological curator. The Planning Authority and/or archaeological curator will be notified by Archaeological Project Services that the use of any such information previously supplied constitutes an infringement under the Copyright, Designs and Patents Act 1988 and may result in legal action.

18.4 The author of any report or specialist contribution to a report shall retain intellectual copyright of their work and may make use of their work for educational or research purposes or for further publication.
