

SECURE ONE SECURITY MADE SIMPLE

Entrusting the protection of your home and family to Secure One is all about feeling comfortable, which is why it's important that our service is friendly as well as professional.

We happily give specialist advice, a free home security survey and, if you wish, a quotation - all without any obligation on your part. If you decide Secure One is for you, most systems will only take one day to install, for your convenience, our security-screened NACOSS installers work Monday to Saturday.

Secure One systems are versatile, too. They can be set to alarm only selected zones, to 'chime' when entry/exit doors are opened, even to provide a standby 'panic' facility before opening your door to a stranger. They can be set to notify central station direct and, when activated, some can contact you anywhere in the UK.

With Secure One everything is taken care of, everything designed to make life as comfortable as possible for you. It really is complete security, made simple.
