CASE OFFICER ASSESSMENT

PROPOSAL

This is a full planning application on land adjacent The Anglia Business Centre, Mill Green Road, Pinchbeck. This application seeks planning permission for the use of land for siting of 110 additional self-store containers. Each metal container will be green in colour and measure 6.1 metres in width, 2.4 metres in depth and have a height of 2.6 metres. The additional containers will be sited to the east of the 30 existing containers. The total number of storage containers on site will rise to 140. The containers in design and dimensions match those of the existing containers on site.

A site visit was conducted on Friday the 6th of October 2023.

An amendment was submitted to revise the Design & Access Statement.

SITE DESCRIPTION

The site is outside of defined settlement limits with a row of semi-detached dwellings to the north-west. The existing business buildings are located to the south and south-west of the proposal site. To the north and north-east beyond established trees are two residential developments. The site immediately to the north was submitted on an outline application under reference H14-0078-23 and is yet to be decided. The site to the north-east was approved under H14-1162-18 and is under construction with some dwellings in habitation. The application site is in Environment Agency Flood Zone 3 and is not subject to increased hazard or depth on the 2115 South Holland Strategic Flood Risk Mapping. No foul and surface water drainage is proposed for the site.

RELEVANT HISTORY

H14-1150-85

Full - Change of use to builders yard & offices - Approved - 22 January 1986.

H14-1536-88

Outline - To erect a dwelling with garage for a company employee - Approved - 12 January 1989.

H14-0179-89

Full - Erection of Building for Storage of Building Materials - Approved - 15 March 1989.

H14-1064-90

Full - Extension to offices - Approved - 31 October 1990.

H14-0034-91

Full - Amalgamation of 2 no. existing stores to form one large store - 07 February 1991.

H14-0328-99

Full - Change of use to re-possession agents to HQ including vehicle compound - Approved - 08 July 1999.

H14-0803-99

Condition Compliance - Details of landscaping (Condition 2 of H14-0328-99) - Approved - 17 September 1999.

H14-0777-00

Full - Extension to form first floor office space - Approved 04 August 2000.

H14-1253-01

Full - Erection of offices - Approved - 22 March 2002.

H14-1208-04

Outline - Erection of single storey dwelling for Manager - Withdrawn - 26 November 2004.

H14-1686-04

Full - Extension of existing office premises - Withdrawn - 21 February 2005.

H14-0877-07

Full - Use of land for the stationing of a portacabin for use as training facilities - Approved - 19 September 2007

H14-0042-08

Condition Compliance - Details of landscaping (Condition 3 of H14-0877-07) - Approved - 12 February 2008.

H14-0153-08

Condition Compliance - Details of additional landscaping and tree planting (Condition 3 of H14-0877-07) - Non-determined - 12 February 2008.

H14-0312-10

Section 73 - Modification of Condition 1 of H14-0877-07 to allow siting of portacabin for a further 3 years - Approved 04 June 2010.

H14-0634-10

Full - Change of use of beet pad to car parking area (retrospective) - Approved - 22 September 2010.

H14-0210-13

Full - Kitchen and toilet extension to office building - Approved - 09 May 2013

H14-0407-13

Section 73 - Modification of Condition 1 of H14-0312-10 to extend the time limit for a further 3 years - Approved - 17 June 2013.

H14-0472-15

Full - Change of use of existing agricultural building to storage use, erection of office extension, new workshop and relocation of Portakabin - Approved - 07 July 2015.

H14-0988-15

Non-material amendment - Change of use of existing agricultural building to storage use, erection of office extension, new workshop and relocation of portakabin - approved under H14-0472-15. Amendments to revise position of windows and doors on workshop side elevation B and rear elevation C - Approved - 26 October 2015.

H14-0980-16

Full - Use of temporary building for occupation by site manager - retrospective - Refused - 18 November 2016.

H14-0193-17

Full - Use of temporary building for occupation by site manager (retrospective) - resubmission of H14-0980-16 - Approved - 11 April 2017.

H14-0941-19

Full - Proposed extension to existing workshop, relocation of existing store, erection of commercial mast, managers accommodation to replace existing mobile home and use of land for vehicle storage. - Approved - 14 November 2019.

H14-0607-20

Condition Compliance - Details of design and position of external boxes etc and means of foul water disposal (Conditions 3 and 5 of H14-0941-19) - Approved - 17 September 2020.

H14-0869-20

Full - Proposed managers accommodation, construction of new access track and use of land for vehicle storage - Approved - 03 December 2020.

H14-0812-21

Full - Proposed Manager's accommodation and access track (to replace that approved under planning permission H14-0869-20), two storey office building, new storage building and stationing of 30 self-store containers. - Approved - 15 October 2021.

H14-0295-22

Section 73 Modification - Proposed Manager's accommodation and access track (to replace that approved under planning permission (H14-0869-20), two storey office building, new storage building and stationing of 30 self-store containers - approved under H14-0812-21. Modification of wording relating to Condition 16. (to clarify implementation of managers accommodation). - Approved - 12 May 2022.

H14-0893-22

Condition Compliance - Details of scheme to deal with external materials, design & position of external meter boxes, gas flues & soil vent pipes, existing & proposed site levels & proposed floor levels and means of foul & surface water disposal (Conditions 4, 5, 7 & 9 of H14-0295-22) - Approved - 18 December 2023

H14-1073-23

Full - Erection of vehicle storage building (Use Class B8) - Awaiting decision.

CONSULTATION RESPONSES

Initial Responses Received (Consultation period between 26 September 2023 and 17 October 2023)

None

Responses Received following Re-consultation (Consultation period between 02 October 2023 and 23 October 2023)

Welland & Deepings Internal Drainage Board - 02 October 2023

No comment.

Pinchbeck Parish Council - 04 October 2023

"Supports employment in the area."

South Holland District Council - Environmental Protection - 13 October 2023

No comments.

Lincolnshire County Council - Highways & SUDS Officer - 16 October 2023

No objections.

Highways

"This is a full Planning Application for stationing of an additional 110 self-store containers on land to the east of the main commercial complex. Due to unprecedented demand, the applicant has decided to increase the number of containers available on site to 140 in total. The proposed area of additional storage totalling 0.73 ha, is partly within the area already approved for vehicle storage under planning permission H14-0812-21. Planning permission has already been granted for the stationing of 30 containers under planning permission (S73 application) H14-0295-22 dated 12th May 2022."

"Access to the storage area is via an existing gated driveway off Mill Green Road, which is well established providing suitable visibility, together with adequate parking and turning area. At the northern extent of the existing vehicle storage area and eastwards beyond that, it is proposed to station a further 110 self-store shipping containers for use by the public for both long-term and short-term storage in addition to the consented 30 containers. Access to the additional self-store containers will be via the existing track along the northern boundary of the site, and there is a coded entry system allowing access to the container area which will be separated by temporary fencing from the vehicle storage area. Entrance into the site where the existing containers are housed is monitored via a security card system and therefore it is possible to provide an accurate picture of movements into the site (which is kept separate to the main site for security reasons). Over a 92-day period there were 347 visits to the 30 containers (which are fully let). This equates to just under 4 visits (3.77) per day (4 in and 4 out) or 1 visit per day for every 8 containers currently on site. The earliest visit was 7:19am and the latest was 10:41pm. The proposal would therefore add a further 12 vehicle movements per day (16 in total) (Total 32 movements in and out) if the current trend is replicated across the additional units. This is probably little more than the daily fluctuation in movements into the entire complex from the main entrance off Mill Green Road. The overall impact of vehicle trips created by the development on the highway network will be negligible and therefore it is considered that the proposed development would not have a severe residual cumulative impact on highway safety or capacity issues in accordance with the NPPF."

Drainage

"The proposed development site is shown mainly to be within Flood Zone 3. With the site not being affected by a breach to both fluvial and tidal sources the storage units will be set at the existing ground level. Part of the site is shown on the Low-Risk scenario Surface Water flood maps, for the 1 in 1000-year event, to be not affected from surface water flooding. The surface water run-off from the roofs of the storage units will discharge to ground and percolate away within the existing hardstanding. No obvious constraints have been identified that may impact the proposed development and the type of mitigation measures that can be used to reduce the flood risk, there is no increase in the flood risk to others."

South Holland District Council - Environmental Protection - 23 October 2023

No comments on amendment 1.

KEY PLANNING CONSIDERATIONS

The main issues and considerations in this case are (but are not limited to):

Principle of Development and Sustainability

Layout, Design and Consideration of the Character and Appearance of the Area

Impact on Residential Amenity/Land Users

Parking / Highway Safety

Flooding Considerations / Drainage

Assessment against SELLP Policy 7 - Improving South East Lincolnshire's Employment Land

EVALUATION

Section 38 (6) of the Town and Country Planning Act, as amended by the 2004 Act, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed above.

The policies and provisions set out in the National Planning Policy Framework (updated December 2023) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Presumption in Favour

Paragraph 10 of the National Planning Policy Framework details that "so that sustainable development is pursued in a positive way, at the heart of the Framework is a presumption in favour of sustainable development (paragraph 11)".

Paragraph 11 expresses that for decision-taking this means: "c) approving development proposals that accord with an up-to-date development plan without delay; or d) where there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date, granting permission unless:

- i. the application of policies in this Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or
- ii. any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.

However, paragraph 12 of the National Planning Policy Framework reiterates that "The presumption in favour of sustainable development does not change the statutory status of the development plan as the starting point for decision-making".

Principle of Development and Sustainability

Policy 1 of the South East Lincolnshire Local Plan sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order. The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy in respect of sustainable development are areas of limited development opportunity including Minor Service Centres, with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location in terms of sustainability.

Policy 1 (Spatial Strategy) of the SELLP indicates that 'the rest' of the Local Plan area outside the defined settlement boundaries of the Sub-Regional Centres, Main Service Centres, Minor Service Centre and Other Service Centres and Settlements is designated as Countryside. Within the 'Countryside', development will be permitted that is necessary to such a location and/or where it can be demonstrated that it meets the sustainable development needs of the area in terms of economic, community or environmental benefits.

When assessed against the relevant criteria the following can be observed:

Economically the proposal will help to support a successful branch of the existing business and aid diversification of the business model. The proposal is not considered to have a community impact save for providing locally based storage opportunities. Environmentally the containers can be moved if and when required, and are not considered to have a material impact on local flora and fauna. The proposal is also considered to accord with Paragraphs 85 and 86 of the December 2023 NPPF which supports the growth and diversification of rural businesses.

As such, the proposal is considered to be in accordance with the requirements of Policy 1 of the South East Lincolnshire Local Plan when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the amenities of neighbouring buildings, parking provision, flood risk and assessment against SELLP Policy 7 which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (2023) specifically relates to 'Achieving well-designed places' and details that "The creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within section 12 of the National Planning Policy Framework (December 2023), states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing. Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

Policy 2 of the South East Lincolnshire Local Plan outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, policy 3 accords with the provisions of section 12 of the National Planning Policy Framework, in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

There is not considered to be a material impact on the character and appearance of the surrounding area. The site of the additional storage containers is not visible from any existing properties or anywhere outside the site boundary. The containers are 2.6 metres in height and the site is bordered by a 4 metre high hedge to the rear of properties to the west and 8 metre high trees and hedging to the northern boundary. There are open fields then 8 metre high trees and hedging to the eastern boundary then beyond an earth bund, fields with trees beyond to the southern boundary. The containers in design and dimensions match those of the existing containers on site.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with policies 2 and 3 of the South East Lincolnshire Local Plan and Section 12 of the National Planning Policy Framework.

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2023) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and

the relationship to existing development and land uses is a main consideration when making planning decisions.

There is not considered to be an overdevelopment of the site. There is a large amount of undeveloped grassed land on the site immediately to the east and south-east of the containers, as well as elsewhere in the site. The site of the additional storage containers is not visible from any existing properties or anywhere outside the site boundary. The containers are 2.6 metres in height and the site is bordered by a 4 metre high hedge to the rear of properties to the west and 8 metre high trees and hedging to the northern boundary. There are open fields then 8 metre high trees and hedging to the eastern boundary then beyond an earth bund, fields with trees beyond to the southern boundary.

When right to light lines are drawn from the proposed containers there is not considered to be an overshadowing impact on any properties of the outline application for dwellings to the north under reference H14-0078-23 which is yet to be decided. The lines drawn do not extend any further than the tree / hedge line. The red line boundary of the container site is 47 metres away from the approved residential site under construction under reference H14-1162-18.

There is not considered to be an overlooking impact from the containers as they are not for habitable use, and the site is bordered to the north, west and east by established trees and hedging up to 8 metres in height. Even if these trees are to be removed the dwellings to the north will likely be bordered by fencing that would prevent overlooking at ground level where the containers are accessed. The application site is flat as is the surrounding land, therefore, when site levels are taken into account an overlooking impact cannot occur from the land on which the containers would be sited to any adjacent land uses.

With regard to potential noise and disturbance, no limits on hours of operation were imposed on previous storage container applications under H14-0812-21 and H14-0295-22. It is therefore considered inappropriate to do so, especially as the Environmental Protection department have no objections to the submitted details.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework, and Policies 2 and 3 of the Local Plan.

Parking / Highway Safety

Section 9 of the National Planning Policy Framework (December 2023) specifically relates to 'Promoting sustainable transport'. Paragraph 115 of the National Planning Policy Framework (December 2023) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe".

Within this context, development should give priority first to pedestrian and cycle movements, facilitate access to high quality public transport, address the needs of people with disabilities and reduced mobility in relation to all modes of transport, safe, secure and attractive places, allow for efficient delivery and access for emergency services, and be designed to enable and encourage ultra-low emission vehicles in safe, accessible and convenient locations.

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

The existing and proposed parking numbers for the site is stated on the application form as five. The Highways Officer has no objections to the submitted details and states:

"This is a full Planning Application for stationing of an additional 110 self-store containers on land to the east of the main commercial complex. Due to unprecedented demand, the applicant has decided to increase the number of containers available on site to 140 in total. The proposed area of

additional storage totalling 0.73 ha, is partly within the area already approved for vehicle storage under planning permission H14-0812-21. Planning permission has already been granted for the stationing of 30 containers under planning permission (S73 application) H14-0295-22 dated 12th May 2022."

"Access to the storage area is via an existing gated driveway off Mill Green Road, which is well established providing suitable visibility, together with adequate parking and turning area. At the northern extent of the existing vehicle storage area and eastwards beyond that, it is proposed to station a further 110 self-store shipping containers for use by the public for both long-term and short-term storage in addition to the consented 30 containers. Access to the additional self-store containers will be via the existing track along the northern boundary of the site, and there is a coded entry system allowing access to the container area which will be separated by temporary fencing from the vehicle storage area. Entrance into the site where the existing containers are housed is monitored via a security card system and therefore it is possible to provide an accurate picture of movements into the site (which is kept separate to the main site for security reasons). Over a 92-day period there were 347 visits to the 30 containers (which are fully let). This equates to just under 4 visits (3.77) per day (4 in and 4 out) or 1 visit per day for every 8 containers currently on site. The earliest visit was 7:19am and the latest was 10:41pm. The proposal would therefore add a further 12 vehicle movements per day (16 in total) (Total 32 movements in and out) if the current trend is replicated across the additional units. This is probably little more than the daily fluctuation in movements into the entire complex from the main entrance off Mill Green Road. The overall impact of vehicle trips created by the development on the highway network will be negligible and therefore it is considered that the proposed development would not have a severe residual cumulative impact on highway safety or capacity issues in accordance with the NPPF."

The volume of visitors to the containers and the impact on the highway network is not considered to be at scale that would materially impact the traffic, parking or highway safety of the surrounding area.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Local Plan Policies 2, 3 and 36, and Section 9 of the National Planning Policy Framework.

Flooding Considerations / Drainage

Section 14 of the NPPF requires development plans to "apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: a) applying the sequential test and then, if necessary, the exception test as set out below".

Paragraph 168 details "The aim of the sequential test is to steer new development to areas with the lowest risk of flooding from any source. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding", with the sequential approach being required in areas known to be at risk now or in the future from any form of flooding, with the flood risk assessment being the tool to demonstrate this.

If, following the application of the Sequential Test, it is not possible, consistent with wider sustainability objectives, for the development to be located in zones with a lower probability of flooding, the Exceptions Test can be applied if appropriate.

The site lies within Flood Zones 3 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the South East Lincolnshire Strategic Flood Risk Assessment (2017) as a basis to apply the sequential test.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial

strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

The application site is in Environment Agency Flood Zone 3 and is not subject to increased hazard or depth on the 2115 South Holland Strategic Flood Risk Mapping. No foul and surface water drainage is proposed for the site.

As the proposal is not for habitable use and there is not increased flood risk, there is not considered to be a need to raise the site levels to address potential flooding. With regard to drainage the Highways & SUDS Officer has the following comments:

"The proposed development site is shown mainly to be within Flood Zone 3. With the site not being affected by a breach to both fluvial and tidal sources the storage units will be set at the existing ground level. Part of the site is shown on the Low-Risk scenario Surface Water flood maps, for the 1 in 1000-year event, to be not affected from surface water flooding. The surface water run-off from the roofs of the storage units will discharge to ground and percolate away within the existing hardstanding. No obvious constraints have been identified that may impact the proposed development and the type of mitigation measures that can be used to reduce the flood risk, there is no increase in the flood risk to others."

It is there for considered that flood risk and drainage is acceptable on site and in accordance with Policy 4 of the South East Lincolnshire Local Plan, 2019, and Section 14 of the National Planning Policy Framework, 2023.

Assessment against SELLP Policy 7 - Improving South East Lincolnshire's Employment Land Portfolio

This proposal is assessed against SELLP Policy 7 - Improving South East Lincolnshire's Employment Land Portfolio. The relevant section of Policy 7 is titled Other Employment Areas and this section states:

"New employment development/businesses or the extension of an existing business outside the above allocated employment sites will be supported provided that the proposal involves the re-use of previously-developed land or the conversion/re-use of redundant buildings. Where it can be demonstrated that no suitable building capable of conversion/re-use is available or the re-use of previously-developed land is not available or is unsuitable, proposals on non allocated sites may be acceptable provided:

- a. the development does not conflict with neighbouring land uses;
- b. there is no significant adverse impact upon the character and appearance of the area;
- c. the design is responsive to the local context;
- d. there will be no significant adverse impact on the local highway network;
- e. there will be no significant adverse impact upon the viability of delivering any allocated employment site;
- f. proposals maximising opportunities for modal shift away from the private car are demonstrated; and
- g. there is an identified need for the business location outside of identified employment areas on the Policies Map."

When assessed against the relevant criteria the following can be observed:

- a. The development does not conflict with neighbouring land uses.
- b. There is no significant adverse impact upon the character and appearance of the area.
- c. The design is responsive to the local context in so far as there are existing matching containers on site, and the container site is not visible beyond the site boundaries. The design and dimensions of the proposed containers matches the existing containers on site.
- d. There will be no significant adverse impact on the local highway network. The County Highways Officer has no objections to the submitted details.

e. There will be no significant adverse impact upon the viability of delivering any allocated employment site. A container storage use is already in operation on site.

f. Proposals maximising opportunities for modal shift away from the private car are not demonstrated. However, the proposed extended container storage use benefits from a countryside location minimising disturbance to the surrounding area.

g. there is an identified need for the business location outside of identified employment areas on the Policies Map. The submitted details show that the site has proved popular and there are large numbers of storage facilities in countryside locations around the district.

The proposal is considered to accord with Policy 7 of the South East Lincolnshire Local Plan, 2019.

Outstanding matters from representation

None

PLANNING BALANCE

As detailed above, Section 38 (6) of the Town and Country Planning Act, as amended by the 2004 Act, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposed additional 110 containers will help to support a popular storage use already provided on site. The containers will not be visible beyond the site boundaries and do not have a material impact on the character and amenity of the surrounding area.

There is green mesh fencing approximately 2 metres in height on the eastern and southern boundaries of the existing storage area. No details of boundary treatment have been proposed for the extended container storage area, therefore it is considered appropriate to impose a details of boundary treatment condition.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

CONCLUSION

This application is considered to accord with 1, 2, 3, 4, 7 and 36 of the South East Lincolnshire Local Plan, 2019, as well as Sections 6, 12 and 14 of the National Planning Policy Framework, December 2023.

RECOMMENDATION

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act

B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).

C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity,

race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.
