SCANIA

Technical specification

The signs placement should harmonise with the facility's architecture.
It should be placed on the left-hand side of the facade on the entrance side.
The trademark lightbox is always placed to the left of the dealer company name sign, with a minimum distance between signs equal to the width of the trademark lightbox.
Distance from corner on wall should be at least equal the symbol's width.

Symbol
Part No.1596061
Mount with Part No. 1595957

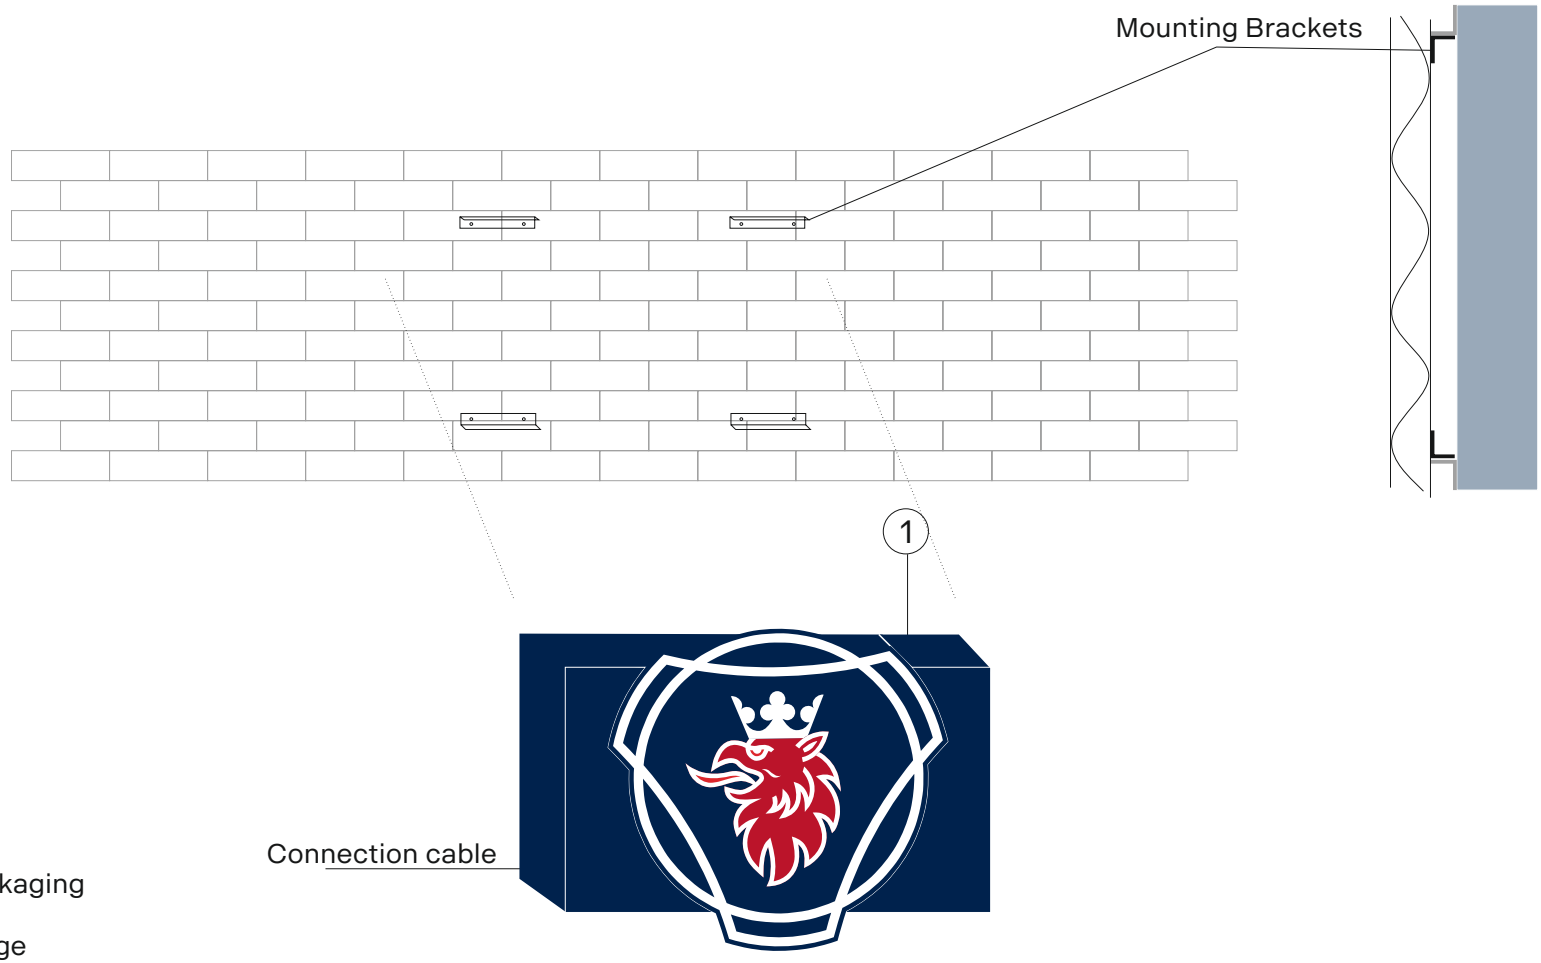

Symbol sign, single-sided illuminated. Convex design. Embedded in a blue powdercoated aluminium face.

Dimensions and weight excl. packaging and transport stand.
Height 730 mm
Width 1039 mm
