SCHEME OF ARCHAEOLOGICAL WORK (MONITORING AND RECORDING) AT WARDENTREE LANE, PINCHBECK, LINCOLNSHIRE

Planning Application No: H14-0156-14
Grid Ref: TF 2466 2478
Accession No: LCNCC 2016. 147

PREPARED FOR
ALLISON HOMES LTD

September 2016

APS provides a comprehensive range of archaeological services

- *Advice*
- *Heritage Statements*
- *Environmental Impact Assessments*
- *Desk-based Assessments*
- *Geophysical Survey*
- *LIDAR*
- *Building Recording*
- *Evaluation*
- *Monitoring and Recording*
- *Mitigation Strategies*
- *Excavation*
- *Finds analysis*

1 SUMMARY

1.1 *A scheme of archaeological work is required during development at Wardentree Lane, Pinchbeck, Lincolnshire.*

1.2 *Previous investigations at the site revealed a localised concentration of Iron Age remains.*

1.3 *The investigation will involve monitoring of development groundwork in the area of the previously identified Iron Age features, and investigation and recording of archaeological remains. Features exposed will be recorded in writing, graphically and photographically. If significant archaeological remains are discovered which are beyond the scope of the monitoring and recording then a further, more detailed, programme of archaeological investigation may be required.*

1.4 *On completion of the fieldwork a report will be prepared detailing the results of the investigation. The report will consist of a narrative supported by illustrations and photographs.*

2 INTRODUCTION

2.1 This document comprises a specification for a scheme of archaeological work during development at Wardentree Lane, Pinchbeck, Lincolnshire.

2.2 This document contains the following parts:

2.2.1 Overview.

2.2.2 Stages of work and methodologies.

2.2.3 List of specialists.

2.2.4 Programme of works and staffing structure of the project

3 SITE LOCATION

3.1 Pinchbeck is located 3km north of Spalding and 20km southwest of Boston, in the administrative district of South Holland, Lincolnshire. The site is located 930m southeast of the centre of Pinchbeck as defined by the parish church of St Mary. It lies to the south of Wardentree Lane and east of Spalding Road at National Grid Reference TF 2466 2478.

4 PLANNING BACKGROUND

4.1 Planning permission (H14-0156-14) has been granted by South Holland District Council for residential development of 169 dwellings at the site.

Permission is subject to a condition requiring the undertaking of an archaeological scheme of monitoring and recording and a brief of requirements has been prepared by the Lincolnshire County Council Historic Environment Officer.

5 SOILS AND TOPOGRAPHY

5.1 Local soils are of the Stockwith Series, typically silty over clayey calcareous alluvial gley soils, with coarse silty calcareous alluvial gley soils of the Wisbech Series immediately north of the site (Robson 1990, 28; 36). These soils are developed on a drift geology of younger overlying older marine alluvium which in turn seals a solid geology of Jurassic Oxford Clay (BGS 1992).

6 ARCHAEOLOGICAL OVERVIEW

6.1 Cropmarks of field boundary and drainage ditches, probably of post-medieval or perhaps medieval date, have been identified at the site (Archaeological Project Services 2013). A previous investigation also post-medieval drainage/boundary ditches. In addition, a localised concentration of Iron Age remains, including ditches and gullies suggesting occupation of date in this area (Archaeological Project Services 2014).

7 AIMS AND OBJECTIVES

7.1 The aim of the work will be to record and interpret the deposits and any archaeological features exposed during the development groundwork.

7.2 The objectives of the investigation will be to:

- Determine the form and function of the archaeological features encountered;
- Determine the spatial arrangement of the archaeological features encountered;
- As far as practicable, recover dating evidence from the archaeological features, and
- Establish the sequence of the archaeological remains present on the site.

8 SITE OPERATIONS

8.1 <u>General considerations</u>

8.1.1 All work will be undertaken following statutory Health and Safety

requirements in operation at the time of the investigation. A Risk Assessment will be prepared.

8.1.2 All work will be carried out in accordance with the *Lincolnshire Archaeological Handbook* (Lincolnshire County Council 2016) and any revisions of such received up to the acceptance of this specification. Additionally, the work will be undertaken in consideration of, and with reference to, the regional research agenda (Knight *et al.* 2012).

8.1.3 The work will be undertaken according to the relevant codes of practise issued by the Chartered Institute for Archaeologists (CIfA 2014), under the management of a Member of the institute (MCIfA). Archaeological Project Services is CIfA registered organisation no. 21.

8.1.4 Any and all artefacts found during the investigation and thought to be 'treasure', as defined by the Treasure Act 1996, will be removed from site to a secure store and promptly reported to the appropriate coroner's office and the Portable Antiquities'/Finds Liaison Officer. The archaeological curator will also be informed.

8.2 Methodology

8.2.1 The scheme of archaeological works will be undertaken during the ground works phase of development, and includes the archaeological monitoring of all phases of soil movement at Plots 37-44, as shown on the attached plan.

8.2.2 Stripped areas and trench sections will be observed to identify and record archaeological features that are exposed and to record changes in the geological conditions. The section drawings of the trenches will be recorded at a scale of 1:10. Should features be recorded in plan these will be drawn at a scale of 1:20. Written descriptions detailing the nature of the deposits, features and fills encountered will be compiled on Archaeological Project Services pro-forma record sheets.

8.2.3 Finds recovered will be bagged and labelled for later analysis. A metal detector will be used to assist artefact recovery.

8.2.4 Throughout the investigation a photographic record will be compiled. The photographic record will consist of:

- the site during the investigation to show specific stages of work, and the layout of the archaeology within the area.
- individual features and, where appropriate, their sections.
- groups of features where their relationship is important.

8.2.5 Should human remains be located they will be left *in situ* and only excavated if absolutely necessary. Should removal be required the appropriate Ministry of Justice licence will be obtained before the exhumation of the remains. In addition, the Local Environmental Health Department, coroner and the police will be informed, where appropriate. The archaeological curators will also be informed.

8.2.6 In the event of the discovery of significant archaeological remains that are beyond the scope of monitoring and recording investigation and which require fuller excavation, construction groundwork will cease until the applicant has secured the implementation of a further programme of archaeological work in accordance with a written scheme of investigation that has been submitted to and approved in writing by the Local Planning Authority/archaeological curators.

8.2.7 In the event of significant archaeological remains being encountered it may be appropriate to take samples for the recovery of industrial residues, economic evidence, palaeo-environmental remains, or carbon dating. Any such sampling, assessment and reporting will be in accordance with current best practice and guidance (eg, English Heritage 2001; 2011).

9 POST-EXCAVATION

9.1 Stage 1

9.1.1 On completion of site operations, the records and schedules produced during the investigation will be checked and ordered to ensure that they form a uniform sequence forming a level II archive. A stratigraphic matrix of the archaeological deposits and features present on the site will be prepared. All photographic material will be catalogued and labelled, the labelling referring to schedules identifying the subject/s photographed.

9.1.2 All finds recovered during the fieldwork will be washed, marked and packaged according to the deposit from which they were recovered. Any finds requiring specialist treatment and conservation will be sent to the Conservation Laboratory at Lincoln.

9.2 Stage 2

9.2.1 Detailed examination of the stratigraphic matrix to enable the determination of the various phases of activity on the site.

9.2.2 Finds will be sent to specialists for identification and dating.

9.3 Stage 3

9.3.1 On completion of stage 2, a report detailing the findings of the investigation will be prepared.

9.3.2 This will consist of:

9.3.2.1 A non-technical summary of the results of the investigation.

9.3.2.2 A description of the archaeological setting of the investigation.

9.3.2.3 Description of the topography of the site.

9.3.2.4 Description of the methodologies used during the investigation.

9.3.2.5 A text describing the findings of the investigation.

9.3.2.6 A consideration of the local, regional and national context of the investigation findings.

9.3.2.7 Plans of the archaeological features exposed. If a sequence of archaeological deposits is encountered, separate plans for each phase will be produced.

9.3.2.8 Sections of the trenches and archaeological features.

9.3.2.9 Interpretation of the archaeological features exposed, and their chronology and setting within the surrounding landscape.

9.3.2.10 Specialist reports on the finds from the site.

9.3.2.11 Appropriate photographs of the site and specific archaeological features.

10 REPORT DEPOSITION

10.1 Copies of the report will be sent to: the client; and Lincolnshire County Council Historic Environment Record.

11 ARCHIVE

11.1 The documentation and records generated during the investigation will be sorted and ordered into the format acceptable to The Collection, Lincoln. This will be undertaken following the requirements of the document titled *Conditions for the Acceptance of Project Archives* for long-term storage and curation. Site code: PIWL16; Accession No: 2016.147. Deposition date: October 2017.

12 PUBLICATION

12.1 Details of the investigation will be input to the Online Access to the Index of Archaeological Investigations (OASIS).

12.2 If appropriate, notes on the findings will be submitted to the appropriate national journals: *Britannia* for discoveries of Roman date, and *Medieval Archaeology* for findings of medieval or later date.

13 CURATORIAL RESPONSIBILITY

13.1 Curatorial responsibility for the archaeological work undertaken on the site lies with the Historic Environment Service of Lincolnshire County Council. They will be given 10 days written notice of the commencement of the project.

14 VARIATIONS AND CONTINGENCIES

14.1 Variations to the proposed scheme of works will only be made following written confirmation of acceptance from the archaeological curators.

14.2 In the event of the discovery of any unexpected remains of archaeological importance, or of any changed circumstances, it is the responsibility of the archaeological contractor to inform the archaeological curators.

14.3 Where important archaeological remains are discovered and deemed to merit further investigation additional resources may be required to provide an appropriate level of investigation, recording and analysis.

14.4 Any contingency requirement for additional fieldwork or post-excavation analysis outside the scope of the proposed scheme of works will only be activated following full consultation with the archaeological curators and the client.

15 PROGRAMME OF WORKS AND STAFFING LEVELS

15.1 The investigation will be integrated with the programme of construction and is dependent on the developers' work programme, and also on the quantity and complexity of archaeological remains encountered. It is therefore not possible to specify the person-hours for the archaeological site. Post-excavation work is likewise dependent on the quantity and complexity of archaeological remains encountered.

15.2 An archaeological supervisor with experience of investigations of this type will undertake the work.

15.3 Post-excavation analysis and report production will be undertaken by the

archaeological supervisor, or a post-excavation analyst as appropriate, with assistance from a finds supervisor, illustrator and external specialists.

16 SPECIALISTS TO BE USED DURING THE PROJECT

16.1 The following organisations/persons will, in principle and if necessary, be used as subcontractors to provide the relevant specialist work and reports in respect of any objects or material recovered during the investigation that require their expert knowledge and input. Engagement of any particular specialist subcontractor is also dependent on their availability and ability to meet programming requirements.

Task	Body to be undertaking the work
Conservation	Conservation Laboratory, Lincoln
Pottery Analysis	Prehistoric – A Beeby, APS Roman – A Beeby, APS Post-Roman - A Beeby, APS
Non-pottery Artefacts	J Cowgill, Independent Specialist/G Taylor, APS
Animal Bones	P Cope-Faulkner, APS/J Rackham/M Holmes, independent specialists
Environmental Analysis	J Rackham, Independent Specialist
Human Remains Analysis	Dr R Gowland, Independent Specialist
Carbon dating	SUERC

17 INSURANCES

17.1 Archaeological Project Services, as part of the Heritage Trust of Lincolnshire, maintains Employers Liability Insurance of £10,000,000, together with Public and Products Liability insurances, each with indemnity of £5,000,000. Copies of insurance documentation can be supplied on request.

18 COPYRIGHT

18.1 Archaeological Project Services shall retain full copyright of any commissioned reports under the Copyright, Designs and Patents Act 1988 with all rights reserved; excepting that it hereby provides an exclusive licence to the client for the use of such documents by the client in all matters directly relating to the project as described in the Project Specification.

18.2 Licence will also be given to the archaeological curators to use the documentary archive for educational, public and research purposes.

18.3 In the case of non-satisfactory settlement of account then copyright will remain fully and exclusively with Archaeological Project Services. In these circumstances it will be an infringement under the Copyright, Designs and Patents Act 1988 for the client to pass any report, partial report, or copy of same, to any third party. The Planning Authority and/or archaeological curator will be notified by Archaeological Project Services that the use of any such information previously supplied constitutes an infringement under the Copyright, Designs and Patents Act 1988 and may result in legal action.

18.4 The author of any report or specialist contribution to a report shall retain intellectual copyright of their work and may make use of their work for educational or research purposes or for further publication.
