Model R Cycle Holder

The VELOPA Model R Cycle Holder

The simplest cycle holder, a familiar sight throughout the UK, allows the tyre of the bicycle to be supported. The stand is fixed to a suitable wall and can be spaced at not less than 610mm between holders for cost effective cycle parking. The Model R is available in either 90° or 45° versions which allow for cycles to be parked either head-on or angled.

The practical and durable nature of the VELOPA Model R cycle holder ensures it has been consistently specified and used since it's introduction in the 1950's.

Shown is the R90 cycle holder.

Options

Order Code	Description	Weight
138200001	R90°	1.9kg
138200002	R45°	1.9kg
