CASE OFFICER ASSESSMENT

Proposal

This is a Section 73 application seeking to modify Condition 6 of H14-0243-23 to allow for the buildings to be used as a showroom and associated office space, for an alternative business.

Condition 6 of this application outlined that the buildings shall be used solely by CSM Carpets & Flooring Ltd and that it shall not be used for any other purposes.

Site Description

The application site is located off Bourne Road in West Pinchbeck. It is located outside any defined settlement boundary and on land regarded being within a countryside location. The land appears to be used for storage and parking in association with the adjacent commercial unit (CMT Engineering). The site has an existing vehicular access off Bourne Road. The site itself is mainly flat surfaced with small areas of hardstanding.

History

H14-0243-23 - Proposed industrial unit to include carpet showroom/store and office accommodation - Approved

Consultation Responses

Lincolnshire County Council Highways Authority

Recommendation: No objection

The proposal is for minor amendments to industrial unit to include carpet showroom/store and office accommodation - approved under H14-0243-23. Modification of Condition 6 to allow the buildings to be used by Boors Limited as storage of decorating goods, paint and painting equipment and associated office space. The minor amendments proposed will not have an adverse impact upon the public highway or surface water flood risk.

No Objections

Having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed development would not be expected to have an unacceptable impact upon highway safety or a severe residual cumulative impact upon the local highway network or increase surface water flood risk and therefore does not wish to object to this planning application.

Public Representation

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, no letters of representation have been received.

Key Planning Considerations

Evaluation - Section 73

The proposal relates to the variation of Condition 6 of H14-0243-23, through seeking permission under Section 73 of the Act. The purpose of an application made under Section 73 of the Town and Country Planning Act 1990 is to vary or remove conditions associated with an existing planning permission. These applications are used to allow for amendments to an approved scheme and can be made both retrospectively and prior to a permission being implemented, as long as the

permission is extant.

The Act is very clear that: "On such an application the Local Planning Authority shall consider only the question of the conditions subject to which planning permission should be granted." As such, the Local Planning Authority are not able to revisit the principle of development and only matters relevant to the specific conditions can be considered. The effect of granting permission would be to issue a new permission with the relevant conditions amended, together with any other relevant conditions from the original permission, or subsequent relevant revisions since this permission.

Planning practice guidance highlights that where less substantial changes are proposed, amending a proposal can occur through 'Amending the conditions attached to the planning permission, including seeking to make minor material amendments'.

The PPG clarifies that "Permission granted under Section 73 takes effect as a new, independent permission to carry out the same development as previously permitted subject to new or amended conditions. The new permission sits alongside the original permission, which remains intact and unamended. It is open to the applicant to decide whether to implement the new permission or the one originally granted". There is no statutory definition of a 'minor material amendment'; but this is likely to include any amendments where its scale and/or nature results "in a development which is not substantially different from the one which has been approved".

In this instance, the subsequent amendments, submitted under this Section 73 application, have not varied the description of development.

In the case of R (Vue Entertainment Limited) v City of York Council, it was concluded that the decision gives clear support for use of s.73 in respect of changes to condition which go beyond 'minor' amendments. It places a clear emphasis on preserving the precise terms of the grant. If an amendment to a condition can be made which keeps the description of the development intact it may well be appropriate to make such an application under a s.73, even if the effect of the change will be significant".

Principle of Development and Sustainability

The South East Lincolnshire Local Plan (2019) sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan (2019) sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan (2019) indicates that within Main Service Centres, development will be permitted that supports their role as a service centre for the settlement itself, helps sustain existing facilities or helps meet the service needs of other local communities.

The application site in this instance is outside the settlement of West Pinchbeck and is therefore in the open countryside as detailed by Policy 1. Regardless of such, the proposal solely relates to modify a condition set on a previous permission which permitted the use of the site as an industrial unit, stating that the proposal itself does not conflict with Policy 7 despite being located in the open countryside. As such, the principle of the site being used as business has been set out under a previous application and does not need to be justified in this instance under this new submission.

Furthermore, it should be assessed whether the new use would have any implications that go against the proposal. The uses would not necessarily differ with the new business fundamentally offering a similar capacity of use with them also falling under the same use class.

As such, the proposal is considered to be acceptable with the requirements of the South East Lincolnshire Local Plan (2019) when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, and impact

on highway safety, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2024) specifically relates to 'Achieving well-designed places' and details that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2024), states that new development should function well and add to the overall quality of the area (beyond the short term and over the lifetime of the development) and should be visually attractive as a result of good architecture, layout and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan (2019) outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework (December 2024), in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework (December 2024) and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The buildings have already been erected and appear to be in use, no external changes are proposed within this submission and therefore the modification of the condition to allow the building to be used by a different business would not have any material harm to the character or appearance of the area. The buildings would appear suitable within this location due to the consistent industrial appearance within this cluster.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the South East Lincolnshire Local Plan (2019) and Section 12 of the National Planning Policy Framework (December 2024).

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2024) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

Whilst no information regarding opening hours have been provided within this submission it would be assumed that the business would be ran similarly to that of what was previously approved. The Application Form within this previous application outlined that the business would be used between 07:30am and 17:00pm Monday to Friday, 07:30am - 17:00pm on Saturdays and 07:30 - 16:30pm on Sundays and Bank Holidays. It is therefore considered that as the business would use the same opening hours and is located in a small industrial area away from any nearby residential dwellings that there should not be any material increase in noise to the area in comparison to what has already been approved and developed.

Whilst there a residential property which shares a boundary with this site, the previous report outlined that there is a garage and driveway which creates a separation distance between the site and the actual house which limits these impacts. As such, there should be no material harm through an increase in noise, furthermore as no new external works are proposed within this submission there should also be no new material harm through overshadowing or overlooking.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2024), and Policies 2 and 3 of the South East Lincolnshire Local Plan (2019).

Highway Safety and Parking

Section 9 of the National Planning Policy Framework (December 2024) specifically relates to 'Promoting sustainable transport'. Paragraph 116 of the National Planning Policy Framework (December 2024) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Further, Policy 36, to be read in conjunction with Appendix 6, of the South East Lincolnshire Local Plan (2019), sets out minimum vehicle parking standards.

Firstly, it should be noted that the previous scheme outlined that there would be eight vehicle parking spaces on site and that there would be a total of four employees, this therefore provides at least four spaces on site for potential customers to park in and ensure they are parked off the highway. Alongside this, LCC Highways have raised no objections to the proposal stating that *'The minor amendments proposed will not have an adverse impact upon the public highway'* and as such no harm is caused from this proposal. Additionally, as the use has already been established under H14-0243-23, there is no change of use which needs assessing within this submission. The new business would not propose any drastic changes that would cause harm to the highway and therefore accords with the relevant policies and does not cause harm the safety of the highway.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Policies 2, 3 and 36 the South East Lincolnshire Local Plan (2019), and Section 9 of the National Planning Policy Framework (December 2024).

Flood Risk

Section 14 of the National Planning Policy Framework (December 2024) explains that "Inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere".

This goes on to state, within Paragraph 172, that all plans "should apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: a) applying the sequential test and then, if necessary, the exception test as set out below".

It is important to note that whilst minor developments such as householders must meet the requirements for site-specific flood risk assessments, they should not be subject to the sequential test, nor the exception test, as outlined in Paragraph 176 and to be read in conjunction with footnote 62.

The site lies within Flood Zones 2 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan (2019) is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the South East Lincolnshire Strategic Flood Risk Assessment (2017) as a basis to apply the sequential test.

Despite the property being within Flood Zone 3 and Danger for Some within the SFRA, as this application is purely to modify the wording of Condition 6 to allow the buildings to be used for a different business the flood risk itself has already been assessed and considered suitable. Furthermore, the building has already been erected with the relevant mitigation measures put into place. As such, there would not be any significant harm raised and it would not materially increase the flood risk for the site and surrounding area in a harmful way.

Overall, when considering the development on balance, it is considered that given the mitigation measures detailed and recommended by condition, the proposal accords with Policies 2, 3 and 4 of the South East Lincolnshire Local Plan (2019) and the intentions of the National Planning Policy Framework (December 2024) in this regard.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking. The principle of the site to be used as a business has already been established under H14-0243-23 with the modification to be used for a different business not proposing any harm as it has previously been in accordance with Policy 7 despite its confliction with Policy 1 and remains this way in this instance. As such, it conforms with the South East Lincolnshire Local Plan (2019) and the provisions of the National Planning Policy Framework (December 2024) when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in

discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking the above considerations into account, the proposal is considered to be in accordance with Policies 1, 2, 3, 4, 7 and 36 (including Appendix 6) of the South East Lincolnshire Local Plan (2019), along with the identified sections contained within the National Planning Policy Framework (NPPF) (December 2024). The are no significant factors in this case that indicate against the proposal and outweigh the consideration in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
