Thank you for consulting us on this.
This section already commented on the application H15-1095-23 date 19-01-24 ref.OWPC42300 and recommended that no further archaeological input was required.
Having reviewed the application documents, the available Historic Environment information and the results from the Archaeological Evaluation for this application, the proposal is unlikely to have an impact on significant archaeological remains. Consequently, I reiterate the previous recommendation: no further archaeological input is necessary for this application.
No objections to Amendment 1.
