

Application Reference: H16-0004-22. Decision Date: 28th February 2022. Note of additional proposed works.

Works were carried out on the Indian bean tree at 26 Westminster Drive, Spalding, identified as T1 of Spalding Tree Preservation Order No. 63 2004, as agreed under Application Reference: H16-0004-22.

During these works a number of serious cracks were found in the branch structure of the tree, which require to be attended to.

The following works, as approved by South Holland District Council may be carried out in addition to those originally approved under Application Reference: H16-0004-22, under the same.

It is 'recommended that the split branches should be cut out and if it need rebalancing' this can be done as is 'necessary after (upon reassessment).'

The works should aim to retain as much of the current branch framework that can safely be done so, whilst striving to achieve a balanced crown.

(This consent allows flexibility to achieve such, based on the photographs provided of the cracked branches.)

All Conditions and Notes present on the original Decision Notice for H16-0004-22 to be adhered to. With regard to the season of the year to prune the Indian bean tree, if works need to be carried out for safety purposes they may be completed, any works not immediately required for this purpose to be carried out in the correct season where possible.

This 'Note of additional proposed works' will be filed with the original Application.

Diane Fairchild Fenton,

Trees and Nature Conservation Officer.

5th May 2022.
