CASE OFFICER ASSESSMENT

Proposal

This is a condition compliance application seeking permission to discharge Conditions 3 and 5 of H16-1028-24.

Site Description

The application site is located off Clay Lake in Spalding and was a former storage of liquified gas and distribution depot. There are residential dwellings located to the north and south west, beyond the dwellings to the north is the Coronation Channel, with various large commercial buildings to the south and east, to the west is open fields.

History

H16-0269-23 - Demolition of admin office, welfare building, associated storage sheds and 7 steel storage tanks - Approved

H16-1028-24 - Use of site for the erection of industrial units - Approved

Consultation Responses

Lincolnshire County Council Highway and Lead Local Flood Authority

The details submitted to discharge condition 5 attached to H16-1028-24 are acceptable in accordance with approved drawing SW25-258- dated July 2025.

South Holland Internal Drainage Board

Byelaw 3 - Consent may be required

Section 23, Land Drainage Act 1991 - Consent not currently required

Byelaw 10 - Not applicable

Planning Considerations

Materials Schedule

Condition 3 of H16-1028-24 states that:

Before the commencement of the development hereby permitted beyond oversite, a schedule of external materials of construction of buildings and hard surfaced areas shall be submitted to and approved in writing by the Local Planning Authority. The development shall be constructed in accordance with the materials so approved.

Reason: To ensure that the Local Planning Authority retains control over the external materials of construction of the development in the interests of the character and appearance of the development and the visual amenity of the area in which it is set.
This Condition is imposed in accordance with Policies 2 and 3 of the South East Lincolnshire Local Plan, 2019 and Section 12 of the National Planning Policy Framework, December 2024.

The external materials are listed as anthracite grey vertical cladding for the walls, grey profile metal sheeting for the roof, aluminium white for the windows, screens and doors and finally uPVC black rainwater goods. These materials are considered to be acceptable and are fairly typical for industrial settings such as this.

The materials proposed allow Condition 3 of H16-1028-24 to be discharged.

Surface Water Drainage Scheme

Condition 5 of H16-1028-24 states that:

The permitted development shall be undertaken in accordance with a surface water drainage scheme which shall first have been approved in writing by the Local Planning Authority.

The scheme shall:

· be based on the results of evidenced groundwater levels and seasonal variations (e.g. via relevant groundwater records or on-site monitoring in wells, ideally over a 12-month period);
· be based on sustainable drainage principles and an assessment of the hydrological and hydrogeological context of the development;
· provide flood exceedance routing for storm event greater than 1 in 100 year;
· provide details of how run-off will be safely conveyed and attenuated during storms up to and including the 1 in 100 year critical storm event, with an allowance for climate change, from all hard surfaced areas within the development into the existing local drainage infrastructure and watercourse system without exceeding the run-off rate for the undeveloped site;
· provide attenuation details and discharge rates which shall be restricted to 1.4 litres per second;
· provide details of the timetable for and any phasing of implementation for the drainage scheme; and
· provide details of how the scheme shall be maintained and managed over the lifetime of the development, including any arrangements for adoption by any public body or Statutory Undertaker and any other arrangements required to secure the operation of the drainage system throughout its lifetime.

No dwelling/ no part of the development shall be occupied until the approved scheme has been completed or provided on the site in accordance with the approved phasing. The approved scheme shall be retained and maintained in full, in accordance with the approved details.

Reason: To ensure that the permitted development is adequately drained without creating or increasing flood risk to land or property adjacent to, or downstream of, or upstream of, the permitted development.
This Condition is imposed in accordance with Policies 2, 3 and 30 of the South East Lincolnshire Local Plan, 2019 and Section 14 of the National Planning Policy Framework, December 2024.

Lincolnshire County Council Highway and Lead Local Flood Authority have commented in response to this application and have outlined that *'The details submitted to discharge condition 5 attached to H16-1028-24 are acceptable in accordance with approved drawing SW25-258- dated July 2025*'.

Furthermore, South Holland Internal Drainage board have commented and outlined that initial testing shows that a drainage strategy reliant on infiltration is likely to be achievable. It should be noted that it is currently unclear if the secondary drainage channel along the eastern boundary will be connected to the wider drainage network off site or if it will be a contained channel acting as a swale with no connection to the wider network. If it would connect to an existing watercourse then this would require consent under Byelaw 3 (Surface Water). Both Byelaw 3 (Treated Foul Water) and Section 23 (Land Drainage Act) are acceptable and would only require consent from the board should the methods change whilst there are no board arterial watercourses nearby and subsequently Byelaw 10 does not apply.

As such, Condition 5 of H16-1028-24 can therefore be discharged.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those

who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Condition 3 and 5 of H16-1028-24 can therefore be discharged.
