Dear Tracey,

the working studio section is for my own use primarily (in the first instance) but it may be that once converted I would rent out some spaces (within the largest open plan studio space) to other artists and I would hope to open the workspace up for future workshops (open to the public) and occasional exhibitions.

kind regards

Francis Ives

Dear Mr Ives,

Would you please provide further details with regard the working studio section. Would this be open to the public, or your own use? If you could respond as soon as possible.

Many thanks
