Dear Peter

**PROPOSED MULTI FUNCTION HALL SPACE AND ASSOCIATED
ACCOMMODATION
AYSCOUGH FEE HALL SCHOOL - SPALDING
PLANNING REF: H16/1339/01**

Following receipt of the approval notices for the above scheme, we now enclose for your review copies of our amended elevations indicating the following revisions, outlined in the approval conditions.

- i. The high level cedar boarding, previously noted on the elevations has been omitted, in favour of a insulated rendered panel. We propose to use the Rockwook Rockshield system, which can be impregnated with various colour pigments (see enclosed literature). Boarded panels have also been omitted as an infill to the glazing system.
- ii. As outline in our correspondence dated 9 January 2003, we also propose to omit the contrasting string course detailed previously in our drawing 01.015.20 (part elevation). This has been amended to a matching red lacy brick (IB stock cheddar red) recessed 15mm, in order to make visual reference to the existing banding detail, to the North East elevation of Welland Hall house.

In addition to the amended drawings, we have also enclosed a rendered 3D image which may help visualise our proposals in context with Welland hall house.

As previously mentioned, we are extremely keen to progress the scheme, in order to accommodate the school's requirements for the new hall to be
