Date	Drawn
FEBRUARY 2021.	SLD.

Scales
1/ 50. 1/ 100. (Unless otherwise stated)

DO NOT SCALE FROM THIS DRAWING

This drawing is copyright and may not be altered, traced, photographed or used for any other purpose other than that for which it is issued. The General Contractor is to check all dimensions on site and report any discrepancies to the Architect. All details shown on this drawing including foundations are based upon typical site conditions and as far as is reasonably can be ascertained for economic purposes. Site conditions may be discovered during construction which may require alterations to the design. Any amendments may be considered. Site and survey information is not guaranteed unless reported in the Architect's Report. Any discrepancies in the dimensions on site and drawings must be reported immediately to the Architect. This drawing is limited in the extent of information contained and does not purport to contain a full specification of the works. It is necessary for the purpose of obtaining Planning / Building Regulation approval, this drawing must not be used as a contract document alone. The works will not be supervised or inspected on site by G.R. Merchant or any representative thereof. It is the client or their appointed agents responsibility to ensure workmanship, satisfaction of materials, adherence to specifications, variations to contract drawings and compliance to the relevant statutory and British Standard requirements. Building Regulation Approval is the responsibility of the client or their appointed agents and is not covered by the Architects fees. Before any excavation or building operations commence it is appropriate that a Surveyor is employed to establish the exact positions of the boundaries and party walls. Any boundary walls shown on this drawing are indicative only and should be inspected by a Surveyor before any demolition or building works commence. Any trees shown on this drawing are indicative only and their exact positions should be established on site. Any trees to be removed should be subject to the necessary consents and their roots should be carefully excavated and grubbed out. Before any building work commences, the Contractor is to ensure adequate temporary propping and bracing is provided to all existing structures affected by the proposed works. Any drains encountered during excavation are to be located and their exact positions established. Where new drains are to be laid near existing drains, trial holes are to be excavated to determine the depth of the existing drains and the new drains are to be laid at a lower level to avoid undermining the existing drains foundations. Where new drains pass through walls, the openings are to be formed with a reinforced concrete lintol over. Where drains are laid under buildings, the pipes are to be surrounded in concrete and the ends of the pipes are to be sealed with a watertight joint
