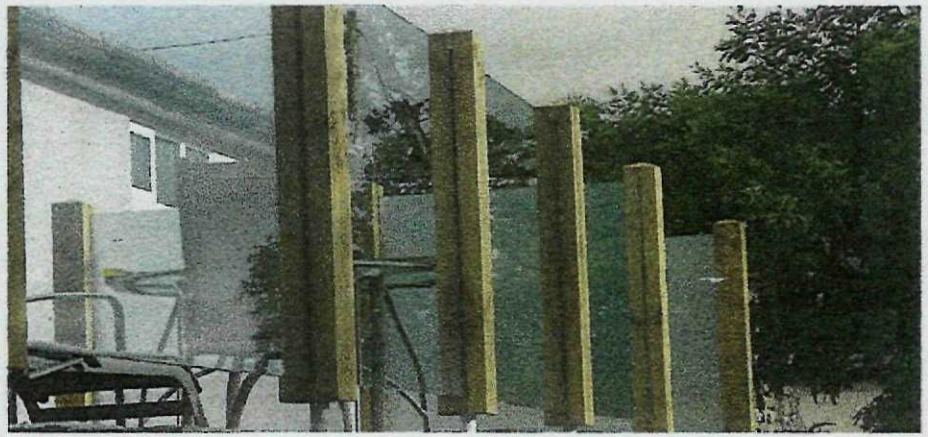
The Glass Balustrade Company

# Terrace & Patio Balustrades : The Glass Balustrade Company



Our external terrace and patio balustrade systems are ideal for adding an extra feature to balconies, terraces and patios.

Our range of quality glass balustrade systems are the perfect contemporary solution to security and safety around decking areas, swimming pools, and garden features.

The patio balustrade can include new modern housing, stainless steel posts, or wooden newels and the glass panels can even be fitted to existing newels.

All our terrace and patio balustrade is manufactured to the highest standards and our stainless steel is extremely weather resistant making it ideal for outside use.

All that is required is a little care and cleaning to ensure your feature stands the test of time.

## The Glass Balustrade that makes the difference

The Glass Balustrade that makes the difference
(http://www.balconyandbalustrades.co.uk/glass-balustrade-makes-difference/)

## The Glass Balustrade that makes the difference

Choosing the right balustrades for your property or project is a big decision, especially the property is exposed to the extremes of British weather. Some balustrades are simply not fit for coastal environments or areas exposed to high winds and rain. Choosing the wrong system could be an expensive mistake.

## Are you frustrated with the performance of your current balustrade system?

We hear complaints from people who have chosen metal balustrade systems that have not been fit-for-purpose and have gone rusty within a matter of months. Sometimes this has even created safety issues.

### The Glass Balustrade that makes the difference

Our customers often tell us that they wish that they had chosen our balustrades and glass system in the first place, saving them all kinds of problems that come with metal balustrades. Not only do metal balustrades rust and become unsafe, but they also tend to block the views. Our rust-proof systems will transform your space and give you extra room to enjoy your beautiful views.

### The right choice of glass coating

We know that your time is also valuable and that's why we recommend BalcoNano® (http://www.balconyandbalustrades.co.uk/self-cleaning-glass-solutions/) , the self-cleaning glass coating that transforms ordinary glass into self-cleaning glass. This coating is especially useful for anyone in a coastal location where sea salt leaves deposits on the glass. BalcoNano® protects the glass and it only needs a quick wipe with a soft cloth to keep it sparkling clean.

## Choose your handrail and glass

Once you have chosen your balustrade you can also choose a finish on your handrail and the shade of glass, customising it to suit your property.
