Subject: Ash Court parking scheme - Info for Application for approval of details reserved by condition

Dear Planning Dept,

Just for confirmation the products that will be used to construct the scheme will be:

Parking Area

- **Sub-base** – 200mm deep Cellweb cellular confinement system infilled with clean angular stone type 4/20mm BS7533-13.
- **Finished surface** – 40mm thick KBI Flexi-pave HD2000 F95.

New footpath

- **Sub-base** – 75mm deep Cellweb cellular confinement system infilled with clean angular stone type 4/20mm BS7533-13.
- **Finished surface** – 35mm thick KBI Flexi-pave HD1500.

Please also note that when I spoke to Laura at Geosynthetics who confirmed that a low CBR was assumed purely as a worst case scenario.

Any queries let me know.
