Public Consultation

A public consultation event was held at the Rugby Club Clubhouse in St Peters Road, Spalding on 25th February 2017. The event was well attended by interested neighbours and locals who wished to view the proposals.

Comments received were positive and constructive - those attending generally welcomed the proposal to tidy-up the pond and to discourage fly-tipping, and understood the principle of a caretaker being able to live on site in order for this to be achieved. Other comments related to on-site visitor parking - which has been increased for this application.
