For/Against Comments

As no new information has been provided with this application the contaminated land condition can not be discharged at this stage.

My comments relating to the previous submission H16-1022-13 still stand:

The information that has been submitted in relation to the contaminated land condition was submitted with the previous application H16-0559-10. At that time I informed the applicant that

only one soil sample had been tested for contamination and that this was insufficient for the site. As no new information has been provided I require further investigations to be carried out at this site.
