Ref: Planning application PP-06876873 - (3-7 Station Street, Spalding)

Dear South Holland Planning Team,

Please accept this letter in support of the above retrospective planning application being submitted on behalf of Sense **(A national charity providing care and support services to both children and adults who are deafblind, multi-sensory-impaired, or who have a single sensory impairment with complex communication needs).**

This application for planning approval is the result of being contacted by Kate Bellamy (Senior Planning Officer, South Holland District Council) who has informed me that the Sense site shown above is located within the towns conservation area, a fact that Sense was unaware of at the time of carrying out the work.

With that said, prior to the work being carried out, great care was taken to ensure that the replacement windows would not only be considerably more energy efficient than the old rotten timber windows they would be replacing, but also that the new windows would be sympathetic in design to the building and its surrounding area.

In support of this application I would like to add that Sense is a not for profit organisation and it is the organisations priority to direct all available funds to delivering its front line services, so that the individuals Sense support can receive the best possible care and support available, that will enable them to live as full and active members of society.

We appreciate that it is not the councils normally policy to permit the proposed changes made within this application, however, we hope that the council will take all matters into consideration when making its decision.

Thanking you in anticipation – Alan Bentley
