I can confirm that the attached written scheme of investigation (or specification) for archaeological monitoring meets the requirements of Condition 3 of the permission granted for the proposed development H16-0715-16.

However, it is not possible to discharge the other archaeological conditions as we are yet to receive notification of work beginning on site, the work being carried out, as well as the final report being received.

I look forward to the archaeological work being carried out and receiving a copy of the final report in due course.
